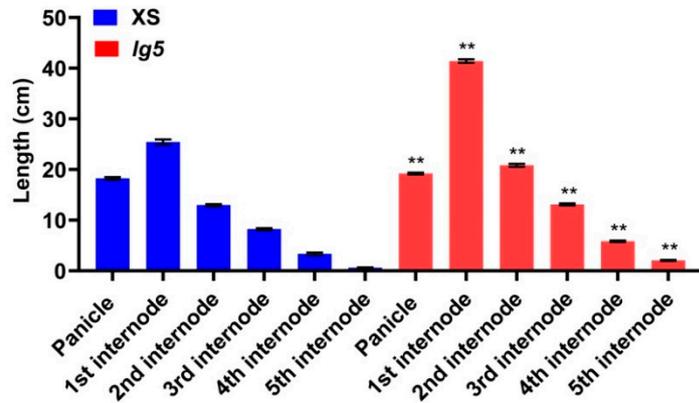

Figure S1. Length of panicle and internode, bar=5cm. Data are given as means ± SD. * and ** indicate $P <$ 0.05 and $P < 0.01$ by Student's t-test.

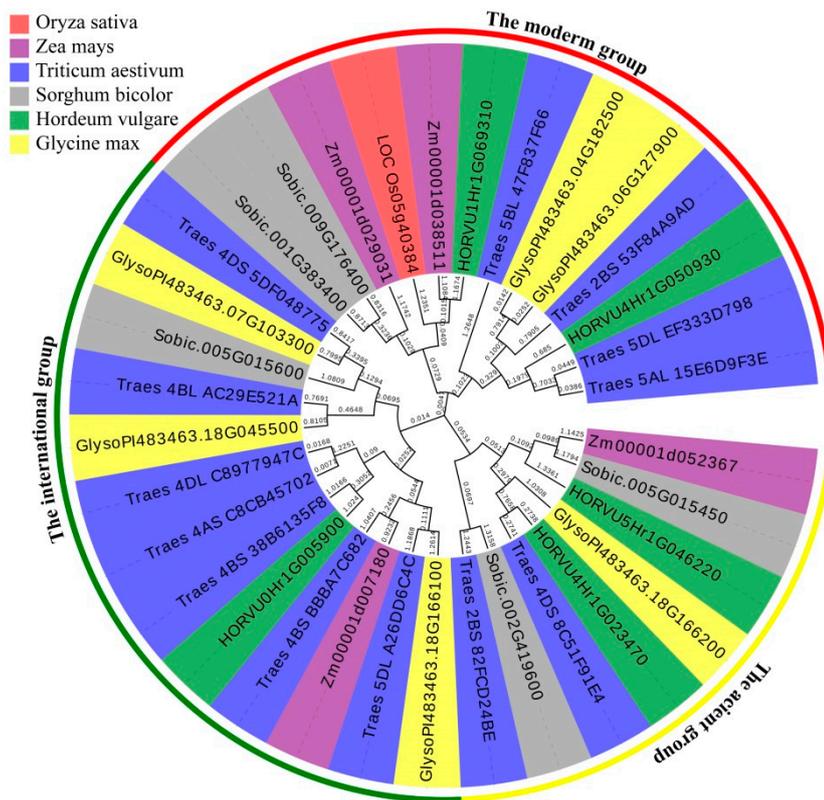

Figure S2. Evolutionary tree of *LG5* in different cereal crops, the tree was constructed by the neighbor-joining method. 33 species from *Oryza sativa* (*Os*), *Zea mays* (*Zm*), *Triticum aestivum* (*Traes*), *Sorghum bicolor* (*Sobic*), *Hordeum vulgare* (*Horv*u), *Glycine max* (*Glysopl*) were constructed by Mega 6 and divided into 3 groups.
