

Supplementary Materials: Figure S2

Transverse trunk tissue sections include conductive phloem (Ph), cambial zone (Cz), expanding cells (Xyl (e)) and cells, which are forming secondary cell wall, and mature cells (Xyl (s+m)) of current year xylem in 40-year-old pine trees. Scale bar = 100 μm . Samples were collected on May 27 (a), June 21 (b) and July 21 (c), 2022.
