20      **Table S4:** Summary of each study site and management in CONWR (Personal Communication Refuge  
21      Manager Mike Brown, 2007).

<b>Site Name</b>	<b>Size and Location</b>	<b>History and Management</b>
<b>Site 1: Headquarters Prairie</b>	<b>1.</b> 6.9 ha <b>2.</b> Located off of Pigeon Creek Road	<b>1.</b> Established 1971 <b>2.</b> Prescribed burns in 1974, 1977, 1981, 1987, 1989, 1990, 1991, 1994, 1997, 2000, 2002, 2004, 2006, 2008, 2010, 2012 and 2014 <b>3.</b> Unit was mowed in August 2001 in an attempt to control <i>Rhus</i> spp. and sprayed with Plateau herbicide to control <i>L. cuneata</i> in 2007 <b>4.</b> 1600 native prairie plants (rootstock) added in 1997, species included: <i>Echinacea</i> sp., <i>Eryngium yuccifolium</i> , <i>Silphium integrifolium</i> , <i>S. laciniatum</i> , <i>Liatris spicata</i> , <i>Parthenium integrifolium</i> , <i>Physostegia virginiana</i>
<b>Site 2: Area 36</b>	<b>1.</b> Approximately 20 ha <b>2.</b> Located off of Pigeon Creek Road, east of Stringtown Road	<b>1.</b> Site of former sewage treatment plant (EPA cleanup completed 2006) <b>2.</b> Tree plantings were unsuccessful due to severe soil compaction <b>3.</b> Seed added (date and species unknown) <b>4.</b> No record of fire treatment
<b>Site 3: Bass Pond</b>	<b>1.</b> 12.1 ha <b>2.</b> Located off of Wolf Creek Road, east of observation deck	<b>1.</b> Established around 1990 <b>2.</b> Prescribed burns beginning in 1993, and continuing in 1996, 1998, 2001, 2003, 2005, 2007, 2008, 2010, 2012 and 2014 <b>2.</b> Reseeded with native prairie species (date and species unknown) and treated with Plateau herbicide to control <i>L. cuneata</i> in 2007.

23

24

25      **Table S5.** Summary climate data for southern Illinois regional airport, Williamson County ( Source  
26      [www.wunderground.com](http://www.wunderground.com)). Historical averages 1973-2014 from Carbondale Sewage Plant, Jackson  
27      County (Source [www.noaa.gov](http://www.noaa.gov)).  
28

	2012	2013	2014	2015	Historical averages
Average high temperature (C)	21.7 <sup>1</sup>	18.3	17.8	19.4	19.3
Average low temperature (C)	8.9	7.2	6.7	8.3	6.8
Average mean temperature (C)	15.0	12.8	12.2	13.8	13.1
Total precipitation (cm)	73.3	106.4	82.5	126.2	116.1

29  
30      <sup>1</sup>. 2012 had 79 days with a maximum daily temperature equal to or exceeding 90 F (32 C) compared  
31      with the historical average of 39 days.  
32

33      **Table S6:** Summary of CRP seed mix (CP-33: tall grass mix) applied to plots. Mix was applied to plots at  
34      an approximate density of 300 seeds per m<sup>2</sup>. \* = sown species that did not establish. † = already present in  
35      plots prior to seeding.

36

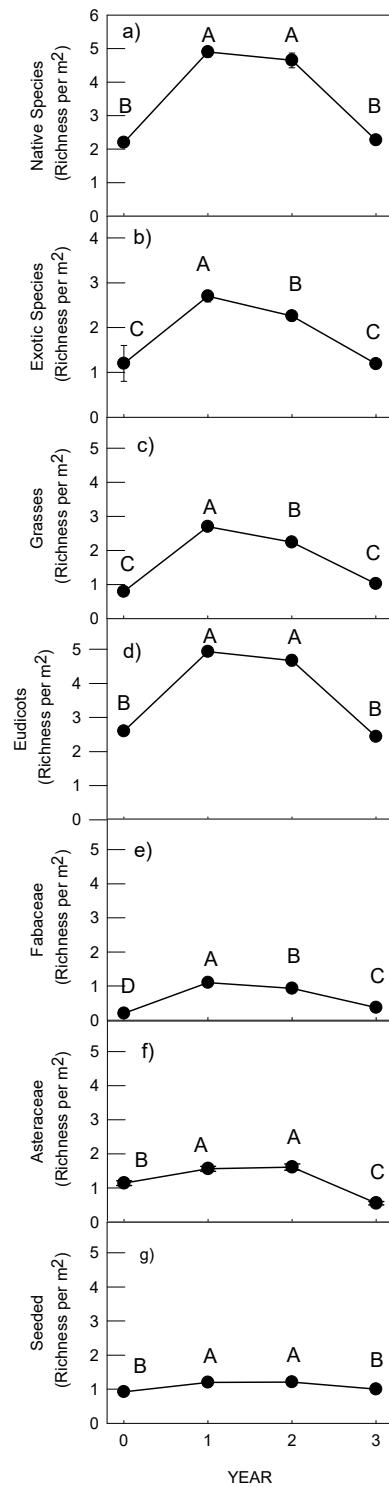

Species	Common Name	Family	% in Mix
<i>Andropogon gerardii</i> †	Big Blue Stem	Poaceae	15.41
<i>Bouteloua curtipendula</i> *	Sideoats grama	Poaceae	15.41
<i>Schizachyrium scoparium</i> †	Little Blue Stem	Poaceae	30.83
<i>Sorghastrum nutans</i> †	Indian grass	Poacea	15.41
<i>Chamaecrista fasciculata</i> †	Partridge Pea	Caesalpiniaceae	3.85
<i>Dalea candidum</i> *	White Prairie Clover	Fabaceae	3.85
<i>Dalea purpurea</i> *	Purple Prairie Clover	Fabaceae	3.85
<i>Desmanthus illinoensis</i>	Illinois Bundle Flower	Fabaceae	3.85
<i>Echinacea pallida</i> *	Pale Purple Coneflower	Asteraceae	1.93
<i>Lespedeza capitata</i>	Bush Clover	Fabaceae	0.96
<i>Penstemon digitalis</i> †	Foxglove Beardtongue	Scrophulariaceae	0.39
<i>Ratibida pinnata</i> *	Yellow Coneflower	Asteraceae	1.93
<i>Rudbeckia hirta</i>	Black-eyed Susan	Asteraceae	1.93
<i>Veronicastrum virginicum</i> *	Culver's root	Scrophulariaceae	0.39

37

38

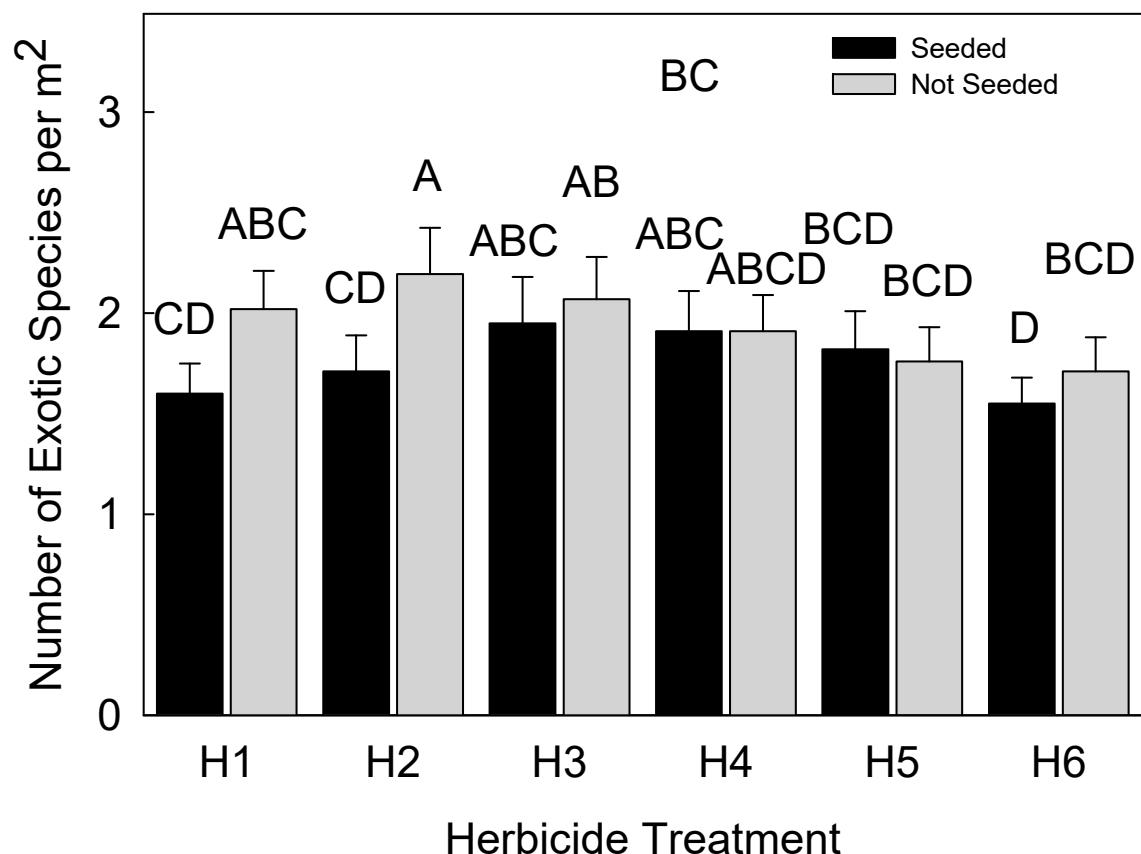

39

40      **Figure S1** Number of species (number per m<sup>2</sup>) by functional group over four years across three sites  
 41      (significance shown in Table S2). Mean values sharing the same letter are not significantly different ( $P <$   
 42      0.05).

44      **Figure S2** Number of exotic species (number per m<sup>2</sup>) in response to significant herbicide by seed  
45      treatment interaction (significance shown in Table S2). Mean values sharing the same letter are not  
46      significantly different ( $P < 0.05$ ). Herbicide treatments (H1-H5, H6 = control per Table 3).

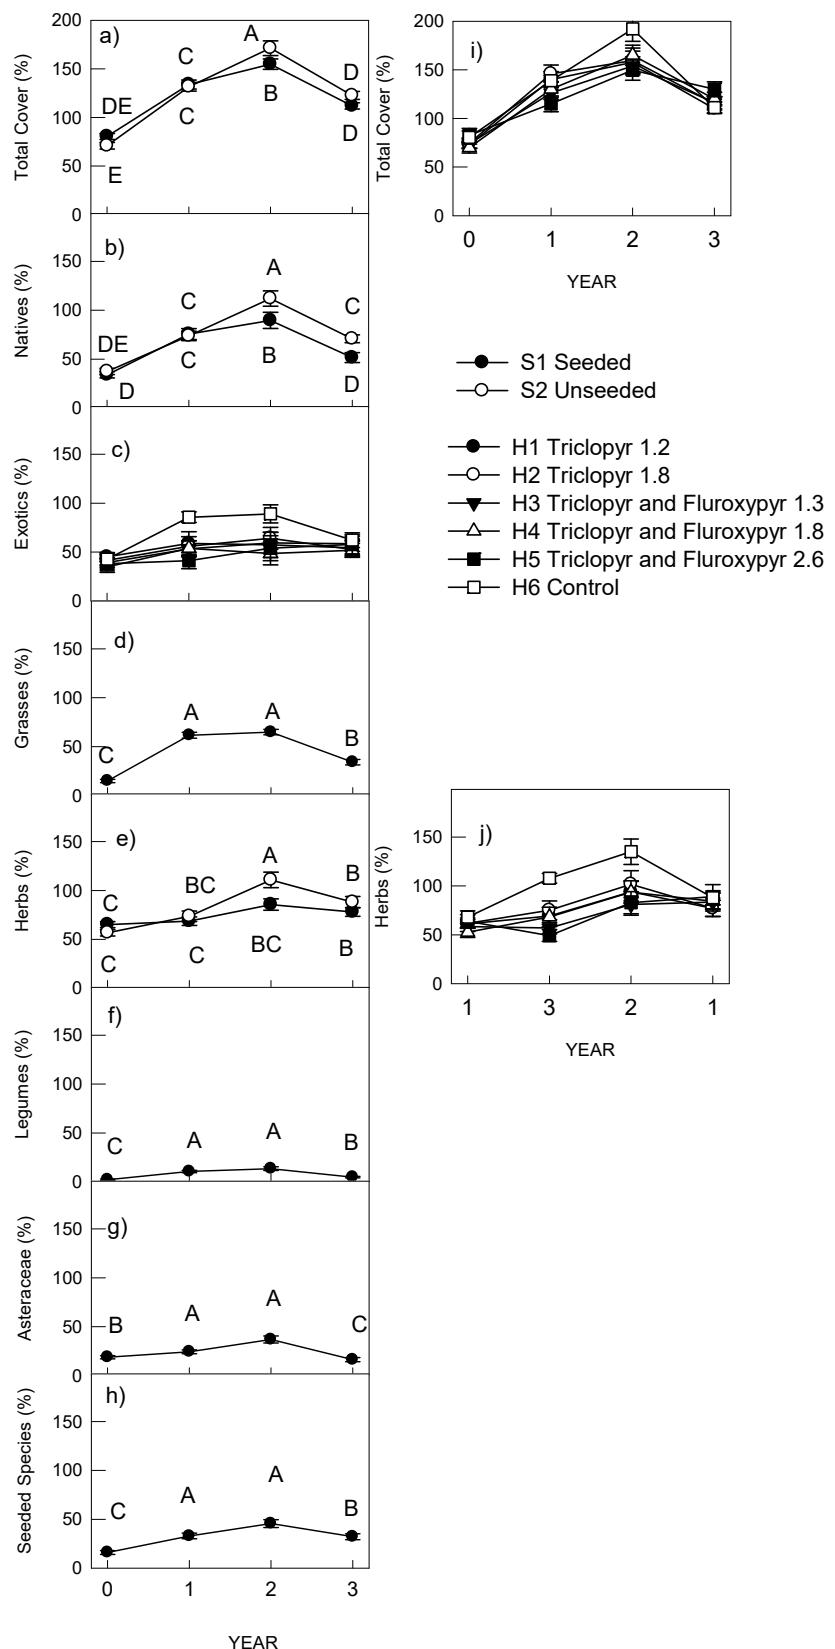

47

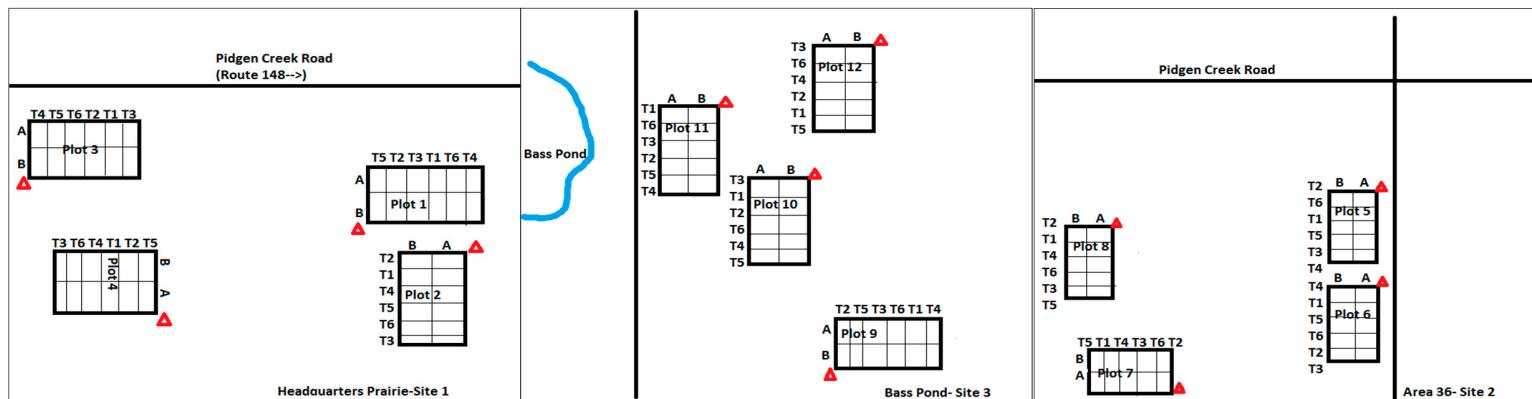

48

49

50      **Figure S3** Cover of species (%  $\pm$  se) by functional group over four years across three sites (significance  
51      shown in Table S3). Mean values sharing the same letter are not significantly different ( $P < 0.05$ ). The  
52      significant interactions between year and seed treatment effects are shown for total cover, native species,  
53      and herbaceous species (S1 = seeded treatment, S2 = unseeded). There were herbicide treatment  
54      interactions with year for total cover, and a three-way interaction effect between year, seed treatment,  
55      and herbicide treatment on the cover of herbaceous species (for clarity the two two-way interactions  
56      between year and seed treatment and year and herbicide treatment are shown). Mean values are shown  
57      for herbicide treatments (H1-H5, H6 = control per Table 3) for panels c), i), and j), for seeded treatments  
58      for panels a), b), and e), other panels show the mean over all treatments (solid circles).

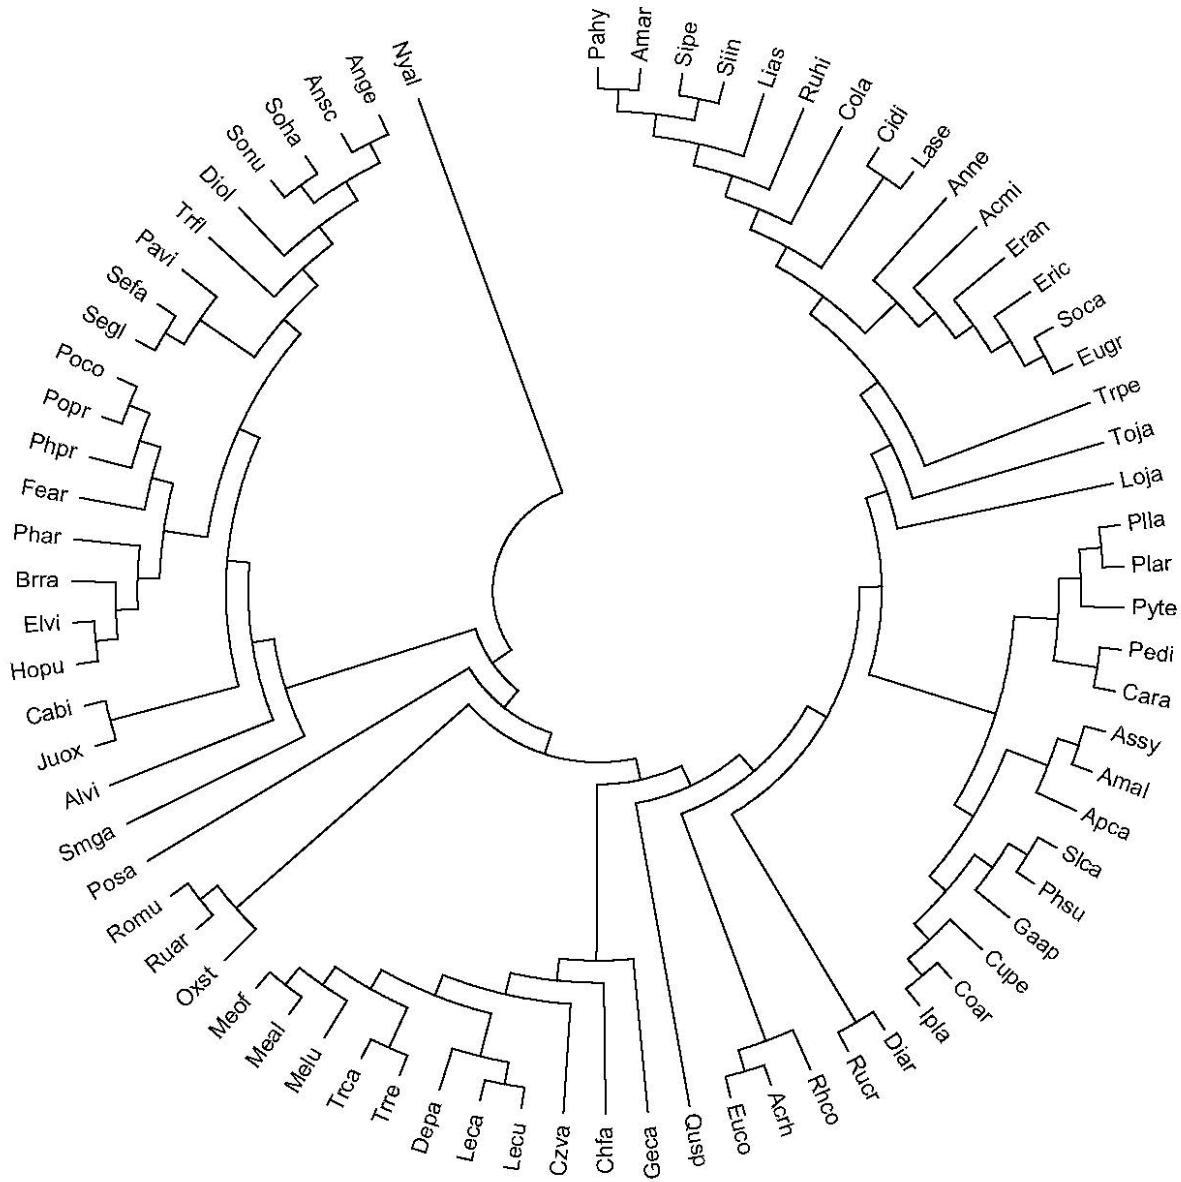

60 **Figure S4:** Schematic maps of each site showing block layout and orientation within these sites. A and B refer to unseeded (A) and seeded strips of  
 61 plots within each block (see table S7). T1-T6 refers to herbicide treatments (H1-H6, see Table 3). Triangles correspond to the asterisks on these  
 62 maps for block orientation. GPS coordinates for each block are: Site 1: Block 1- N 37 43.134 W 089 01.597, Block 2-N 37 43.141 W 089 01.592, Block  
 63 3- N 37 43.154 W 089 01.686, Block 4- N 37 43.143 W 089 01.696; Site 2: Block 5- N 37 43.461 W 089 02.394, Block 6- N 37 43.471 W 089 02.394,  
 64 Block 7- N 37 43.570 W 089 02.353, Block 8- N 37 43.515 W 089 02.292; Site 3: Block 9- N 37 41.536 W 089 03.146, Block 10- N 37 41.554 W 089  
 65 03.147, Block 11- N 37 41.563 W 089 03.161, Block 12- N 37 41.573 W 089 03.154.  
 66

77      **Figure S5** Phylogenetic tree of all species encountered across the three sites from 2013 – 2016. Species  
78      codes as in Table S1. *Nymphaea alba* (Nyal) was included in the phylogeny as an outgroup.
