

Supplementary material

Table S1. Climate data and bioclimatic indices for the western (a) and eastern (b) grape growing area of PDO ‘Orvieto’ (central of Italy). Indexes calculated for the period 1995–2015 and 2004–20015, for the western and eastern sub-areas, respectively. Western sub-area: white grape varieties. Eastern sub-areas: red grape varieties. LSG, length of the growing season; GST, growing season average temperature, Tmin, yearly mean Tmin; Tmax, yearly mean Tmax, WI, Winkler index, HI, Huglin index; CI, cool night index.

Year	LGS	GST	GST Class limits (Nesbitt et al.) [45]					HI class limits (Tonietto and Carboneau) [36]	CI	CI class limits (Tonietto and Carboneau) [36]	Tmax (month prior harvest date)	N° days		N° days		N° days
