

**Table S1.**

Spectral features of *A. unedo* wild berries analysed.

| Origin     | Group Frequency wavenumber (cm <sup>-1</sup> ) | Vibration modes          |
|------------|--|--------------------------|
| O-H        | 3300   | Stretching vibration     |
| C-H        | 2970, 2935                                     | Symmetric and asymmetric |
| C-H; -CO-H | 2870   | Stretching vibration     |
| C=O        | 1750   | Stretching vibration     |
| C-C-O      | 1500-1450                                      | Stretching vibration     |
| COO-C      | 1078   | Stretching vibration     |
