## Supplementary file 1

Table 1. Mapping of COM-B components to the Theoretical Domains Framework[1]

COM-B

Domain (definition)

Constructs

component **CAPABILITY** Physical skills Skills (An ability or proficiency acquired through Skills development practice) Competence **Physical** Ability Practice Skill assessment Knowledge Knowledge (including knowledge of (An awareness of the existence of condition/scientific rationale) something) Procedural knowledge Knowledge of task environment Cognitive & interpersonal skills Skills (An ability or proficiency acquired through Skills development practice) Competence Ability Interpersonal skills **Psychological** Practice Skill assessment Memory, attention & decision processes Memory (The ability to retain information, focus Attention selectively on aspects of the environment Attention control and choose between two or more Decision making Cognitive overload/tiredness alternatives) Behavioural regulation Self-monitoring (Anything aimed at managing or changing Breaking habit objectively observed or measured actions) Action planning **OPPORTUNITY** Social influences Social pressure (Those interpersonal processes that can Social norms Social cause individuals to change their thoughts, Group conformity feelings, or behaviours) Social comparisons Environmental context & resources **Environmental stressors** (Any circumstance of a person's situation Resources/material resources Organisational culture/climate or environment that discourages or **Physical** encourages the development of skills and Salient events/critical incidents abilities, independence, social competence Person × environment interaction and adaptive behaviour) Barriers and facilitators **MOTIVATION** 

Reflective	Social & professional role & identity (A coherent set of behaviours and displayed personal qualities of an individual in a social or work setting)  Belief about capabilities (Acceptance of the truth, reality or validity about an ability, talent or facility that a	Professional identity Professional role Social identity Identity Professional boundaries Professional confidence Group identity Leadership Organisational commitment Self-confidence Perceived competence Self-efficacy
	person can put to constructive use)	Perceived behavioural control Beliefs Self-esteem Empowerment Professional confidence
	Optimism (The confidence that things will happen for the best or that desired goals will be attained)	Optimism Pessimism Unrealistic optimism Identity
	Belief about consequences (Acceptance of the truth, reality, or validity about outcomes of a behaviour in a given situation)	Beliefs Outcome expectancies Characteristics of outcome expectancies Anticipated regret Consequents
	Intentions (A conscious decision to perform a behaviour or a resolve to act in a certain way)	Stability of intentions Stages of change model Transtheoretical model and stages of change
	Goals (Mental representations of outcomes or end states that an individual wants to achieve)	Goals (distal/proximal) Goal priority Goal/target setting Goals (autonomous/controlled) Action planning Implementation intention
Automatic	Reinforcement (Increasing the probability of a response by arranging a dependent relationship, or contingency, between the response and a given stimulus)	Rewards (proximal/distal, valued/not valued, probable/improbable) Incentives Punishment Consequents Reinforcement Contingencies Sanctions

Emotion		Fear
(A comp	lex reaction pattern, involving	Anxiety
experien	tial, behavioural, and	Affect
physiolo	gical elements, by which the	Stress
individu	al attempts to deal with a	Depression
personal	ly significant matter or event)	Positive/negative affect
		Burn-out
