The journal retracts the article titled "Higher-Dimensional Geometry and Singularity Structure of Osculating Type-II Ruled Surfaces in Lorentzian Spaces" [1], cited above.

Following publication, concerns were brought to the attention of the Editorial Office regarding the relevance and accuracy of several references cited in the study [1].

In accordance with the journal standard procedures, the Editorial Office and Editorial Board conducted an investigation that identified a significant number of citations that were not sufficiently relevant to the article's content, as well as several non-existent references. Consequently, the Editorial Board has lost confidence in the reliability of the reported findings and has decided to retract this publication in accordance with MDPI's retraction policy.

This retraction was approved by the Editor-in-Chief of the *Mathematics* journal.

The authors have been informed of this retraction and have indicated their disagreement with this decision.
