

Information sheet – control group

Participation at the TARGET-READ study

Madame, Sir,

Thank you for participating in the Target-READ study, which focuses on reducing the risk of rehospitalization for patients.

You have been selected to be part of the control group, and as such you will benefit from a normal discharge from the hospital. Your family doctor will soon receive a letter from the hospital with information about your hospital stay.

As announced, **someone will contact you by phone within a month** to ask you some questions, especially if you had to return to the hospital.

We thank you in advance for your very valuable cooperation.

The entire study team wishes you a safe return home and a speedy recovery.

For the research team, Professor Jacques Donzé

Contact in case of questions about the study:
