In the original publication [1], there was a mistake in Figure 1 as published. On the left side of the figure, at the screening stage "reports sought for retrieval", instead of the number $n = 3$, there should be $n = 31$, while, on the right side of the figure, at the screening stage "reports sought for retrieval", instead of the number $n = 1$, there should be $n = 43$. The corrected Figure 1 appears below. The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
