

Supplemental Materials

Table S1. Treatment recommendations by the decision aids.

Decision aid	Stroke risk algorithm used	Bleed risk algorithm used	Additional factors	Recommendations
AHA guidelines	CHA ₂ DS ₂ -VASc			Non-OAC if CHA ₂ DS ₂ -VASc = 0; Non-OAC or OAC if CHA ₂ DS ₂ -VASc = 1; OAC if CHA ₂ DS ₂ -VASc ≥ 2
Casciano tool	CHADS ₂	ATRIA	Age and gender	Case specific
CHEST guidelines	CHADS ₂			Non-OAC, if CHADS ₂ = 0; OAC if CHADS ₂ ≥ 1
ESC guidelines	CHA ₂ DS ₂ -VASc	Warrants a caution if HAS-BLED score ≥ 3		Non-OAC if CHA ₂ DS ₂ -VASc = 0; Non-OAC or OAC if CHA ₂ DS ₂ -VASc = 1; OAC if CHA ₂ DS ₂ -VASc ≥ 2
LaHaye tool	CHA ₂ DS ₂ -VASc	HAS-BLED	Treatment threshold, cost threshold and bleed ratio	Case specific

AHA guideline: the 2014 American College of Cardiology/American Heart Association Task Force on Practice Guidelines, Casciano tool: Decision tool developed by Casciano *et al.*, CHEST guidelines: the 2012 American College of Chest Physicians (CHEST) guidelines, ESC guidelines: the 2012 European Society of Cardiology (ESC) guidelines, LaHaye tool: Decision tool developed by LaHaye *et al.*

Table S2. Inclusion and exclusion criteria.

AF Population of Lifelink data	# of Enrollees
Population (January 1st, 2001 through June 30th, 2013)	
Inclusion criteria:	
Primary/secondary AF diagnosis (ICD-9-CM code 427.31) between January 1st, 2002 through March 31th, 2013 (inpatient and outpatient files)	222520
Primary AF diagnosis (ICD-9-CM code 427.31) between January 1st, 2002 through March 31th, 2013 (inpatient, outpatient or ancillary files)	135618
At least 12 months of continuous enrollment in the pre-index period	83643
At least two AF diagnoses in the inpatient or outpatient files	65045
At least one diagnosis of AF at least 30 days after initial diagnosis in the study period	55320
At least one primary diagnosis of AF in the outpatient setting in the study period	55213
At least 18 years of age at the time of initial primary diagnosis of Atrial Fibrillation in the study period	54805
At least 12 months of pharmacy benefits in the pre-index period	39251
At least 3 months of pharmacy benefits in the post-index period	38434
No. of patients after applying the exclusion criteria:	
Patients with perioperative/ transient atrial fibrillation	38434
Patients with inpatient or outpatient diagnosis of mitral stenosis or prosthetic heart valve	36571
Patients with concomitant hyperthyroidism or thyrotoxicosis	35842
Patients with a diagnosis of AF in the pre-index period	19719
Patients with a prescription claims for oral anticoagulants	17031
Patients with a claim for INR/PT test	15603
Patients who have an thromboembolic event, intracranial hemorrhagic or extra-cranial hemorrhagic event within 90 days of their index AF diagnosis	15413
Potential duplicates across two datasets (if the index date, year of birth, gender, patient region and first date of enrolment are same)	15129
Final sample size	15129

Table S3. Stroke risk and bleeding risk scores.

Score	CHADS2 N (%)	CHA2DS2-VASc N (%)	ATRIA N (%)	HAS BLED N (%)
0	3950 (26.11%)	2073 (13.70%)	4281 (28.30%)	2890 (19.10%)
1	5186 (34.28%)	3197 (21.13%)	5465 (36.12%)	4754 (31.42%)
2	3620 (23.93%)	3022 (19.97%)	1202 (7.95%)	4608 (30.46%)
3	1530 (10.11%)	2578 (17.04%)	2033 (13.44%)	2053 (13.57%)
4	591(3.91%)	2035 (13.45%)	883 (5.84%)	652 (4.31%)
5	202 (1.34%)	1224 (8.09%)	237 (1.57%)	149 (0.98%)
6	50 (0.33%)	628 (4.15%)	545 (3.60%)	21 (0.14%)
7		260 (1.72%)	253 (1.67%)	2 (0.01%)
8		97 (0.64%)	37 (0.24%)	
9		15 (0.1%)	150 (0.99%)	
10			43 (0.28%)	

Table S4. Number of patients concordant with the OAC or non-OAC treatment recommendation by decision aids.

Stroke risk	Bleeding risk	AHA Aggressive	AHA Conservative	Casciano	CHEST	ESC	LaHaye
Low (CHA ₂ DS ₂ -VASc score = 0)	Low (HAS-BLED score = 0)	1001 (61.49%)	1001 (61.49%)	1001 (61.49%)	1001 (61.49%)	1001 (61.49%)	1001 (61.49%)

* Indicates statistically significant difference at $p < 0.001$. † Indicates statistically significant difference at $p < 0.05$. AHA Aggressive: AHA guidelines (assuming that guideline recommends OAC at CHA₂DS₂-VASc = 1), AHA Conservative: AHA guidelines (assuming that guideline recommends non-OAC at CHA₂DS₂-VASc = 1), Casciano: Casciano tool, CHEST: CHEST guidelines, ESC: ESC guidelines, LaHaye: LaHaye tool.
