

Figure S1. Volcano plot of GBM vs HC purified IgG proteomics. Up: proteins that are increased in GBM purified IgG vs HC purified IgG, Down: proteins that are decreased in GBM purified IgG vs HC purified IgG, Non-sig: proteins that not significantly changed between GBM and HC purified IgG

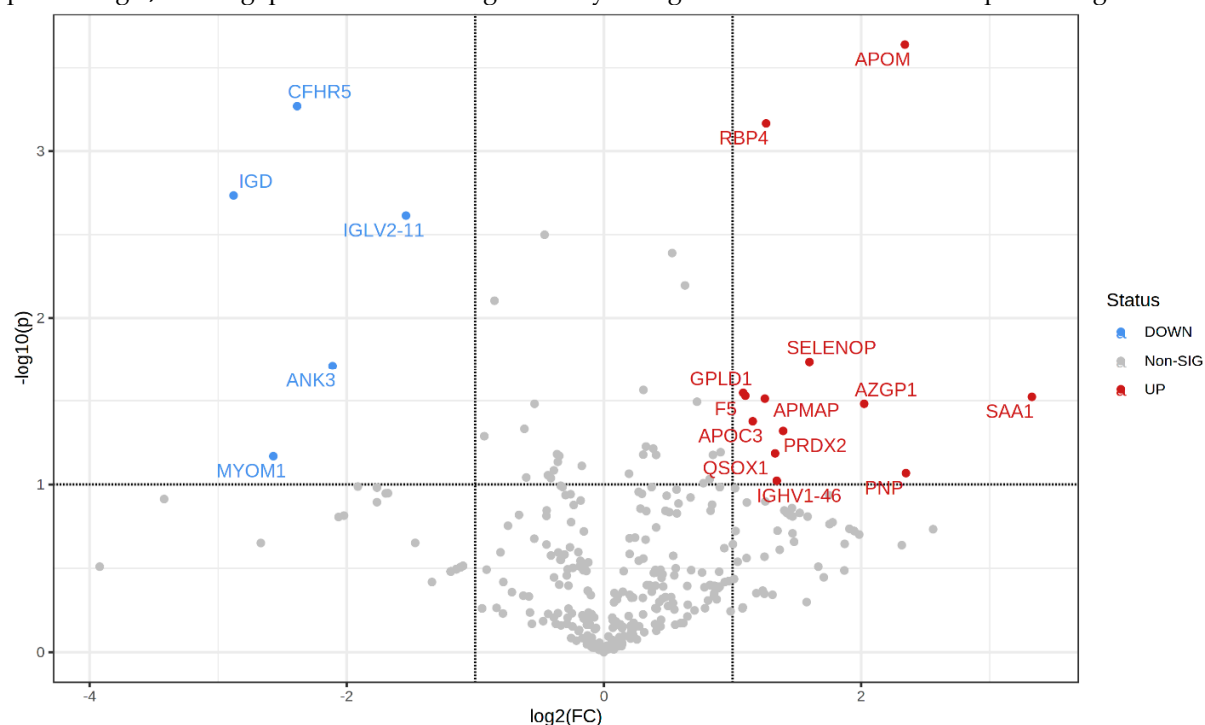

Figure S2. Volcano plot of GBM vs HC EV proteomics. Up: proteins that are increased in GBM EV vs HC EV, Down: proteins that are decreased in GBM EV vs HC EV, Non-sig: proteins that not significantly changed between GBM and HC EV.
