

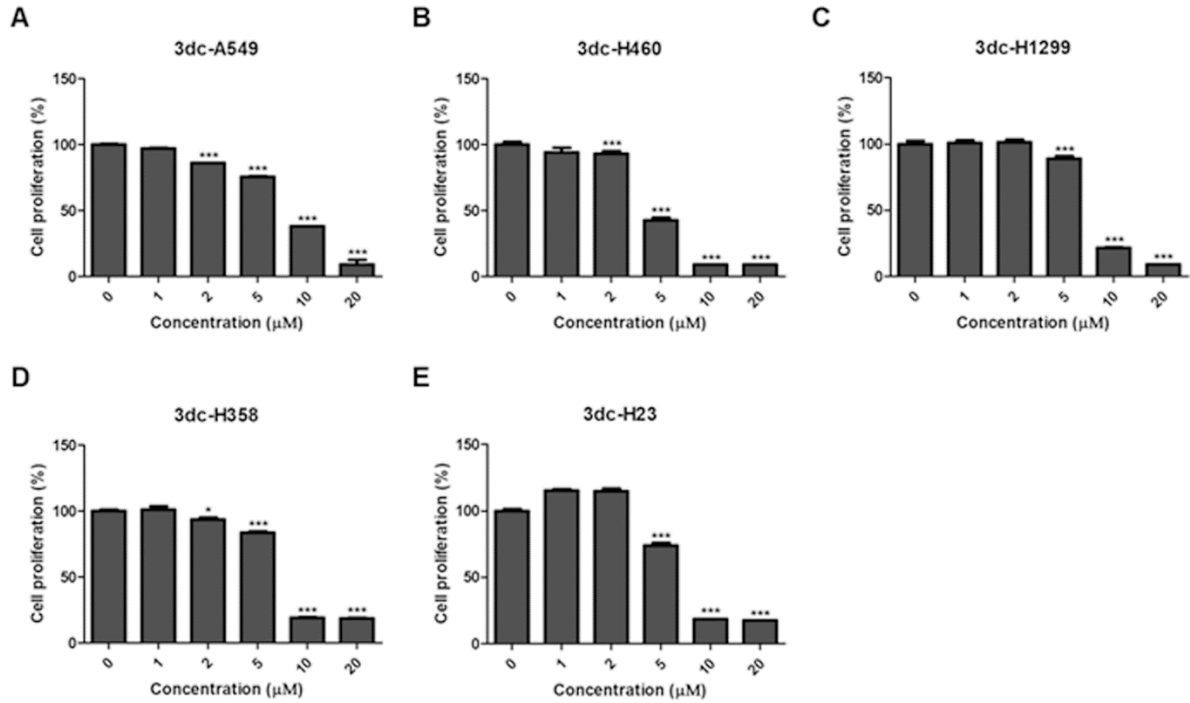

Figure S1

Effect of 3dc on NSCLC cell proliferation. NSCLC cells (A549, H460, H1299, H358, H23) were treated with 3dc at various concentrations (0-20 μM). Cell proliferation was assessed using MTT assay. Data shown as mean \pm S.E. * $P < 0.05$, *** $P < 0.001$ vs. CTL (0 μM for each).
