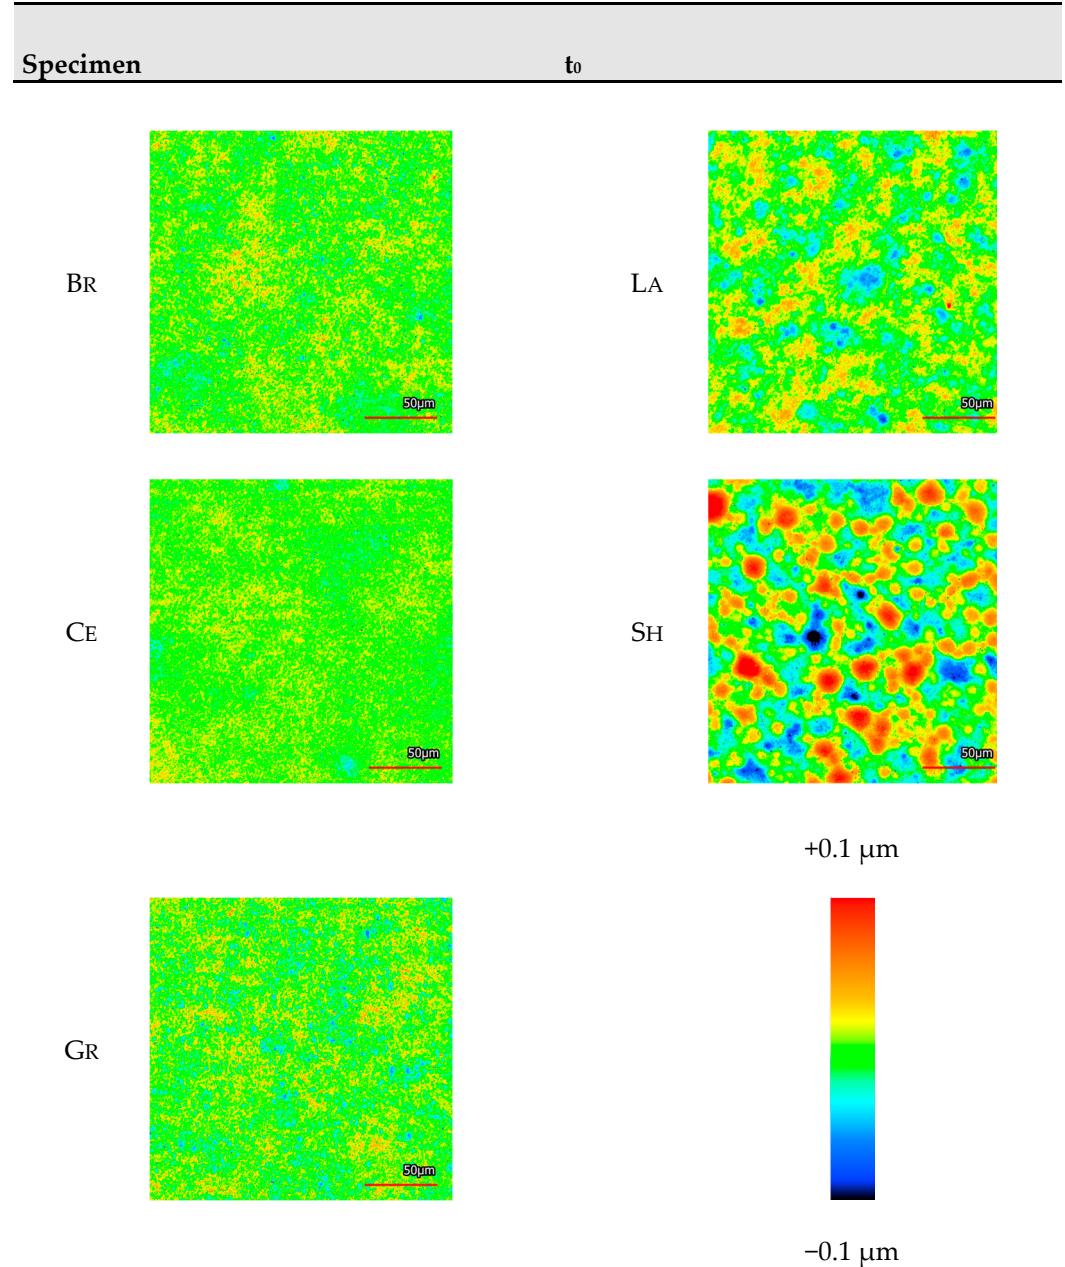

Figure S1. Surface of the CAD/CAM resin composite specimen before (t_0) immersion in the different media. Representative surface renderings are shown in height-scaled false colours. A pronounced heterogeneity can be observed in the surfaces of SH compared to the other CAD/CAM resin composites: BRILLIANT Crios (BR), CERASMART (CE), Grandio blocs (GR), Lava Ultimate (LA), SHOFU Block HC (SH).

Table S2. Media-specific Vickers hardness (HV) of the different specimens.
