

Table S1. Frequency of concomitant diseases in patients with aortic aneurysm/dissection included in the study (n=79)

<b>Concomitant heart diseases</b>	Patients, n	%
Heart defects	55	70
Multifocal atherosclerosis	24	30
Coronary heart disease	20	25
Hypertension	57	72
Cardiac arrhythmias: atrial fibrillation, atrial flutter, or ventricular extrasystole	14	18
Conduction disturbances	4	5
<b>Other concomitant diseases</b>		
Connective tissue dysplasia	10	12
Chronic kidney disease	16	20
Type II diabetes mellitus	7	9
Diseases of the gastrointestinal tract, including gastritis, duodenitis, gastroduodenitis, gastric ulcer and/or duodenal ulcer in remission	48	61
Obesity of any degree	12	15
