

Supplemental material.

Table S1. Characteristics of the children living in a nuclear family at the six months' interview according to participation in the 11-year follow-up/inclusion in this study.

		Participant 11-year	Non-participant
		N=31,519	N=36,749
		%	%
<i>Child gender</i>	Boy	47.4	52.6
	Girl	52.8	48.4
<i>Parental mental health</i>			
	Psychiatric care: mother before birth of child	4.9	7.4
	Psychiatric care: father before birth of child	4.7	6.1
<i>Maternal burden at 6 months</i>			
	Mother burdened by relation to father		
	yes	12.5	12.7
	Mother burdened by economy		
	yes	18.3	19.7
<i>Socio-demographic</i>			
Maternal age	16-22	1.9	3.5
	23-28	33.6	36.0
	29-34	48.5	46.0
	35+	15.9	14.5
Maternal education at birth of child			
	Primary only	4.9	9.1
	Secondary	36.6	44.1
	1-3 post-secondary	43.0	35.6
	4 + post-secondary	15.5	11.2
Paternal education at birth of child			
	Primary only	10.3	13.9
	Secondary	45.6	49.2
	1-3 post-secondary	27.3	23.8
	4 + post-secondary	16.8	13.0

Figure S1. Histogram of distribution of change in total SDQ scores in maternal report from age 7 years to 11 years (N=24,479).
