Table S3. Revisions in Cases Which did Not Develop AVN.

Author, Year	Revisions in Non-AVN cases	N of Non-AVN SCFE cases	Rate of Revisions in Non-AVN SCFE cases	Specific Details of Revision
Galletta et al., 2021	7	65	10.8%	1 case of HO, 2 cases for fixation failure, 1 with femoral neck non-union, 3 with ROH for hardware intolerance
Agashe et al., 2020	1	28	3.6%	One patient with hip subluxation, requiring open reduction
Passaplan et al., 2020	4	16	25.0%	6 non-AVN related revision surgeries in 4 total patients. One patients required ROH, 1 patient required offset correction followed by ROH, 1 patient required arthroscopic offset correction, 1 required removal of hardware followed by open offset correction
Zuo et al., 2020	1	21	4.8%	One early implant failure leading to conversion to PAO
Masquijo et al., 2019	NR	NR	NR	Does not differentiate between non-AVN and AVN related revisions. 10 total revision procedures in 21 total patients.
Novais et al., 2019	NR	NR	NR	Seven of 27 total patients had unplanned procedures however does not differentiate if these cases of AVN of non-AVN related revisions

Ebert et al., 2019	2	11	18.2%	One patient with LLD requiring correction, one open reduction and loose body removal for hip instability
Davis et al., 2019	3	10	30.0%	Post-operative hip subluxation or dislocation requiring revision
Sikora-Klak et al., 2019	1	10	10.0%	1 case of LLD requiring revision
Jackson et al., 2018	NR	7	NR	None
Trisolino et al., 2018	NR	NR	NR	None
Ziebarth et al., 2017	14	43	32.6%	9 hips underwent screw removal, four hips underwent offset correction, two with open acetabular rim trimming and offset correction
Abdelazeem et al., 2016	1	31	3.2%	one hip developed deep infection with AVN and ultimately required hip fusion, one hip developed completed head collapse and required screw removal
Novais et al., 2015	NR	NR	NR	None
Novais et al., 2015	1	14	7.1%	1 removal of intra-articular penetrating pin, 1 revision of fixation due to implant failure, and then THA for treatment of osteonecrosis
Souder et al., 2014	NR	13	NR	None
Upasani et al., 2014	NR	33	NR	15 revision procedures for femoral head AVN, fixation failure, or postoperative dislocation.
Arora et al., 2013	NR	6	NR	None
Madan et al., 2013	0	24	0.0%	None
Sankar et al., 2013	3	20	15.0%	4 broken implant revisions, 3 successful. 3 revisions successful, 1 developed AVN due to noncompliance with weight-bearing restrictions.
Alves et al., 2012	2	2	100.0%	One successfully revised for K-wire fixation failure, another successfully revised for limb length discrepancy.
Masse et al., 2012	1	20	5.0%	One successful revision for intra-articular wire penetration.
Huber et al., 2011	4	29	13.8%	4 failed with cortical screw (out of 20 treated with cortical screw)
Slongo et al., 2010	NR	22	NR	None
Ziebarth et al., 2009	3	40	7.5%	Three successful revisions at 6 to 8 weeks post-op for screw or wire fixation breakage.
Leunig et al., 2007	3	30	10.0%	Two cases were screw fixation failures, third case was a bent full threaded wire. All three successfully revised.
