

Transcription

Spliceosome

Cell Motility

Bacterial chemotaxis

Flagellar assembly

RNA polymerase

Basal transcription factors

Ribosome

Aminoacyl-tRNA biosynthesis

DNA replication

Folding, Sorting
and Degradation

Ubiquitin mediated proteolysis

RNA degradation

Proteasome

Mismatch repair

Non-homologous end-joining

Base excision repair

Protein export

Homologous recombination

Replication
and Repair

Nucleotide excision repair

ABC transporter

Signal
Transduction

Two-component system

Bacterial secretion system

Phosphotransferase system (PTS)
