FOLO, forced-air precooling + 30 μm PE liner; FOLX, forced-air precooling; FXLO, 30 μm PE liner; FXLX, control. Mean values followed by different letter(s) within a column denote the significant difference ($p < 0.05$) by Duncan’s multiple range test (DMRT). ^{ns}, ^{**}, not significant or significant at, $p < 0.001$, respectively. DW (dry weight), (n = 6).

A**B**

Figure S1. Three-dimensional (3D) sparse partial least squares-discriminant analysis (sPLSDA) scores plot representing treatments of observed parameters of bell pepper cv. Nagano harvested at 90% coloring (A) and 50% coloring (B), and stored at 11 °C and 95% RH for 15 and 16 days respectively. FOLO, forced-air precooling + 30 μ m PE liner; FOLX, forced-air precooling; FXLO, 30 μ m PE liner; FXLX, control.
