

Supplementary Material

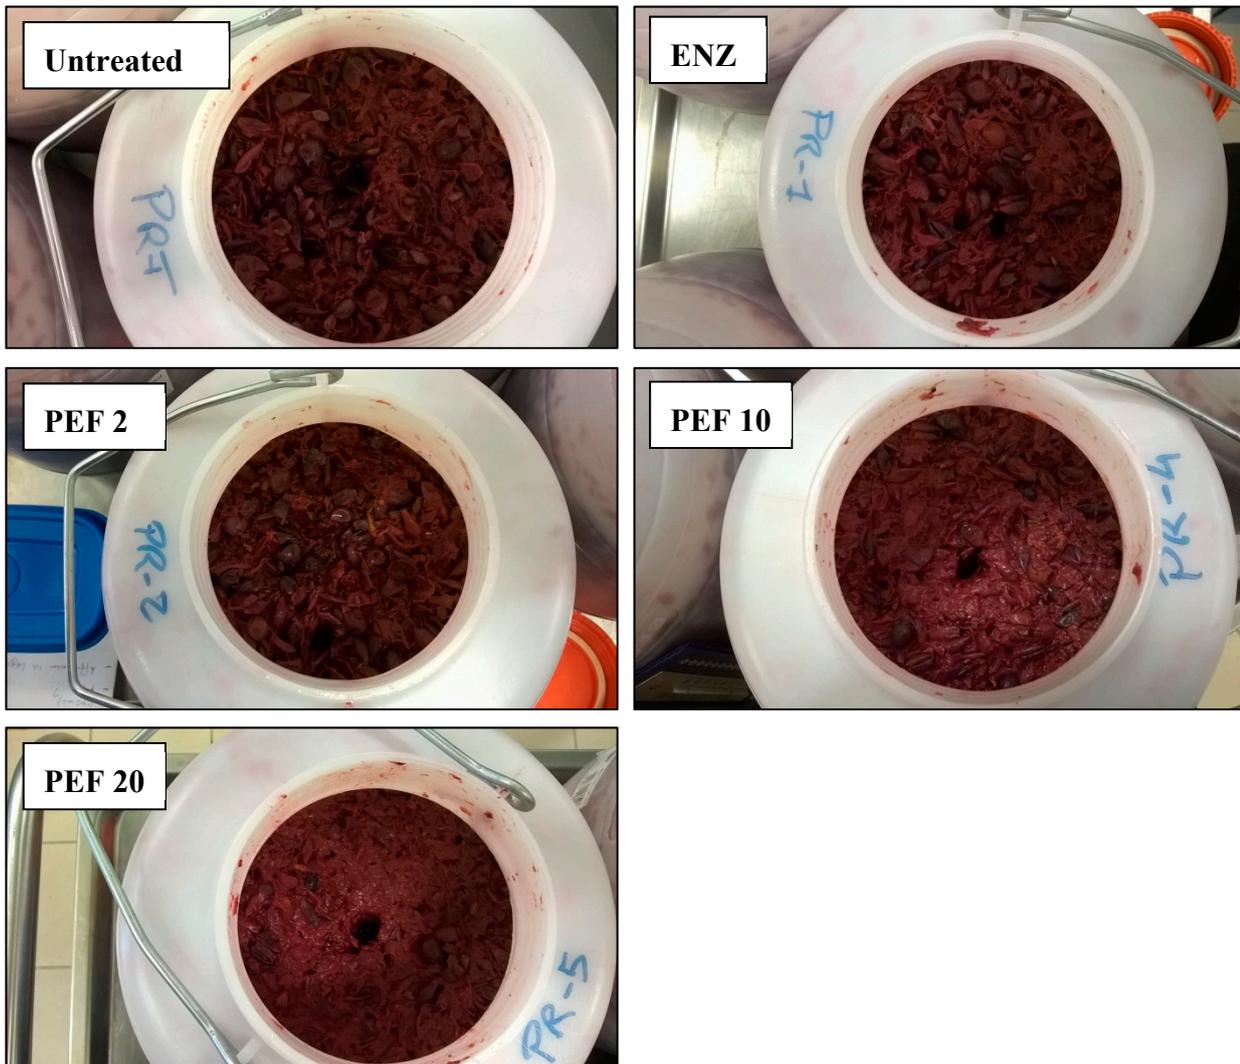

Figure S1. Samples at the third day of maceration, showing the greater breakdown of the skin integrity, for the treatments with higher specific energy. Pictures taken before punching-down the pomace. Untreated: control, no treatment; ENZ: pectolytic enzymes (20 mg kg^{-1}); PEF 2: PEF treatment, 2 kJ kg^{-1} ; PEF 10: PEF treatment, 10 kJ kg^{-1} ; PEF 20: PEF treatment, 20 kJ kg^{-1} . PEF, pulsed electric field.
