

Supplementary figure 2 – standardized pre-transfusion checklist

Hb <6g/dL

- a. ☐ Irrespective of compensatory capacity

Hb 6-8g/dL

- a. ☐ Indicators of anaemic hypoxia (tachycardia, hypotension, ischemia on ECG, lactic acidosis)
- b. ☐ Reduced compensatory capacity, presence of risk factors (coronary disease, heart failure, cerebrovascular diseases)
- c. ☐ Other indications.....

Hb 8-10g/dL

- a. ☐ Indicators of anaemic hypoxia (tachycardia, hypotension, ECG ischemia, lactic acidosis)
- b. ☐ Other indications

Hb >10 g/dL

- a. ☐ Other indications
