^a F, forest; FL, forest line; TL, tree line; TSL, tree species line; S, shrub; Raw PE, the raw PE reads produced by sequencer; Raw tags, the tags reads obtained by combining; Clean tags, the reads after filtered out raw reads with low quality and short length; Effective tags, the clean reads after filtered out chimeras; Bases, the base numbers of the effective reads; Average length, the average length of the effective reads; Q20 and Q30, the percentages of bases with quality values > 20 and 30 in the effective reads; GC content, the percentage of GC bases in the effective reads; Effective rate, the percentage of the effective reads in the raw PE reads.
