

Supplementary Figure S1: PNKY expression is downregulated during neural differentiation. (A) undifferentiated (left) and differentiated (right) NCCIT cells. (B) The expression level of PNKY, like the expression level of stemness factors including Oct4/ Nanog /Nucleostemin, is downregulated during differentiation of NCCIT cells. The values shown represent the mean \pm SE. * p value < 0.05, ** p value < 0.01.
