# Publisher's Note: Clinical and Translational Neuroscience—A Swiss Journal for a Global Readership

Peter Roth

MDPI, St. Alban-Anlage 66, CH-4052 Basel, Switzerland; roth@mdpi.com

In its 5th year of existence, the journal CLINICAL AND TRANSLATIONAL NEUROSCIENCE [1] was transferred to the MDPI journal portfolio. It's affiliated with 5 neurological societies represented by the Swiss Federation of Clinical Neuro-Societies (SFCNS) [2]. Currently the Editorial Board consists of 38 experts together with 7 Editors who monitor and manage not only the contents but also the different editorial publishing processes to guarantee fair and efficient results [3]. The journal follows an author-centered philosophy to ensure that findings can be shared quickly with other researchers around the world to stimulate fruitful research activities without delay.

The journal offers a wide variety of sections which should ease the start of community building Special Issues [4]. Please submit your ideas and proposals through the journal website! [https://www.mdpi.com/journal/ctn/special\\_issues](https://www.mdpi.com/journal/ctn/special_issues).

And if you are confronted with difficulties to organize the necessary funding for the article processing fees—please don't hesitate to ask the Editorial Office for discounts or waivers.

A warm welcome with a toast to the entire Editorial Board, active reviewers, authors, readers and society members for the relaunch of CLINICAL AND TRANSLATIONAL NEUROSCIENCE!
