Received: 11 August 2020; Accepted: 30 August 2020; Published: 1 September 2020

The *Ceramics* journal has reached its first milestone with the publication of the 100th paper since its creation in 2018.

The 100 papers published by *Ceramics* concern the following topics:

- Novel Processing Routes of Ceramics for Functional Applications [1–6]
- Advances in the Field of Nanostructured Ceramic Composites [7–11]
- Functional Ceramics for Energy Applications [12–18]
- Ice Templated and Freeze Cast Ceramics [19–25]
- Ceramics for Biomedical Applications [26–34]
- Damage and Lifetime of Ceramic Matrix Composites [35–41]
- Advances in Luminescent Materials [42]
- Design, Properties, Damage and Lifetime of Refractory Ceramics [43–53]
- Advances in Structural Ceramic Materials [54–60]
- The Past, Present and Future of Additive Manufacturing [61]
- Design, Fabrication and Assessment of Ceramics for Advanced Optical Applications [62–67]

The paper that has received the highest number of citations is “Electrical Behavior and Microstructural Features of Electric Field-Assisted and Conventionally Sintered 3 mol.% Yttria-Stabilized Zirconia” by Sabrina G.M. Carvalho, Eliana N.S. Muccillo and Reginaldo Muccillo.

Furthermore, the *Ceramics* journal has published eight Special Issues:

- Advances in the Field of Nanostructured Ceramic Composites edited by Laura Montanaro and Paola Palmero https://www.mdpi.com/journal/ceramics/special_issues/Advances_Nanostructured_Ceramic_Composites
- Functional Ceramics for Energy Applications edited by Kyle G. Webber, Tor Grande and Mari-Ann Einarsrud https://www.mdpi.com/journal/ceramics/special_issues/functional_ceramics_energy_applications
- Design, Fabrication and Assessment of Nanostructured Materials and Systems for Advanced Optical Applications edited by Alessandro Chiasera, Anna Lukowiak, Francesco Scotognella and Maurizio Ferrari https://www.mdpi.com/journal/ceramics/special_issues/nanostructured_materials_optical_applications
- Novel Processing Routes of Ceramics for Functional Applications edited by Stephane Hocquet and Laurent Boilet https://www.mdpi.com/journal/ceramics/special_issues/processing_routes_ceramics_functional_applications
- Ice-Templated and Freeze-Cast Ceramics edited by Sylvain Deville https://www.mdpi.com/journal/ceramics/special_issues/ice_freeze
- Damage and Lifetime of Ceramic Matrix Composites edited by Gilbert Fantozzi, Nathalie Godin and Pascal Reynaud https://www.mdpi.com/journal/ceramics/special_issues/Damage_Lifetime_CMC
- Ceramics for Biomedical Applications edited by Laurent Gremillard and Jérôme Chevalier https://www.mdpi.com/journal/ceramics/special_issues/ceramics_biomedical

- Design, Properties, Damage and Lifetime of Refractory Ceramics edited by Jacques Poirier https://www.mdpi.com/journal/ceramics/special_issues/refractory_ceramics

We should like to acknowledge all the authors of the published papers for their contribution. We want also to acknowledge the editors of the Special Issues for their significant work.

Now, we must continue to develop the *Ceramics* journal and encourage the submission of papers and the participation of board members. We want also to encourage young researchers to publish in the journal by creating a Ceramic Travel Award in 2020.

For this development, we need your confidence and your participation. I am counting on you to make a success of our *Ceramics* journal.
