† Presented at the 2nd International Conference on Sciences and Techniques for Renewable Energy and the Environment, Al Hoceima, Morocco, 28–30 April 2026.

In submitting conference proceedings for the 2nd International Conference on Sciences and Techniques for Renewable Energy and the Environment (STR2E 2026) to *Engineering Proceedings*, the Volume Editors of the proceedings would like to certify to the publisher that all papers published in this volume have been subjected to peer review by the designated expert referees and were administered by the Volume Editors strictly following the policies announced on the conference website [1].

The whole process was supervised by the conference committee and the Volume Editors, adhered to the professional and scientific standards expected of a proceedings journal published by MDPI, and complied with the peer review policy and guidelines of *Engineering Proceedings*, which can be found at the following link: https://www.mdpi.com/journal/engproc/instruction_for_conference_organizers (accessed on 6 August 2026). The review reports were checked and archived by the Editorial Office of *Engineering Proceedings*.

- Type of peer review: 2–4 triple-blinded reviewers.
- Conference submission management system: Online submission system on conference homepage.
- Number of submissions received: 42.
- Number of submissions sent for review: 22.
- Number of submissions accepted: 17.
- Acceptance rate: 0.4 (40%).
- Average number of reviews per paper: 2.11 per paper.
- Total number of reviewers involved: 36.
- Any additional information on the review process: Please refer to Figure 1.
