Correction

Correction: Ajala (2026). Shell's Greenwashing by Proxy in Nigeria: Corporate Narratives and Media Representation. *Journalism and Media*, *7*(3), 171

Samuel Ajala

Department of Communication, University of Arkansas, Fayetteville, AR 72701, USA; sajala@uark.edu

Addition of one reference and removal of duplicated citation

During a final review of the article (Ajala, 2026), the author noticed that one reference was inadvertently omitted from the published version. In Section 3.4, the second occurrence of the citation "(Akanbi, 2021)" was included in error, and "(Agbo, 2024)" should be included instead. The first paragraph of Section 3.4. should be revised as follows:

(. . .)A similar pattern appears in the Oruma, Goi, and Ikot Ada Udo spills (Akanbi, 2021), where legal maneuvers delayed compensation until the UK High Court granted more than 13,000 farmers and fishermen the right to sue Shell over allegations that the company prioritizes profit over its stated social responsibility (Agbo, 2024).(. . .)

The reference list should also be updated to include the following reference:

Agbo, E. (2024). *Oil spillage: Two Nigerian communities secure major legal victory against Shell in UK*. Premiumtimesng.com. Available online: https://www.premiumtimesng.com/news/headlines/744803-oil-spillage-two-nigerian-communities-secure-major-legal-victory-against-shell-in-uk.html (accessed on 4 August 2026).

In addition, in Section 3.5 (page 12, second paragraph), the second occurrence of the citation "Koop et al. (2023)" was inserted in error and has been removed. The paragraph should be revised as follows:

On methane specifically, Koop et al. (2023) reports that independent experts dispute Shell's claimed reductions in upstream flaring, citing undeclared flaring at fields Shell operates, and documents the disproportionate health burden gas flaring places on nearby communities.

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor, and the original publication has also been updated.
