MDPI has been publishing several medical journals, including the International Journal of Neonatal Screening [1], the Journal of Cardiovascular Development and Disease [2], the Journal of Functional Morphology and Kinesiology [3], the Journal of Personalized Medicine [4], and the fast-growing Journal of Clinical Medicine [5]. We would like to launch one more medical journal—*Bloods*—as an international journal of hematology. Starting from the chemistry journal *Molecules* [6], we launched several journals bearing a one-word plural noun as titles, *Sensors* [7], *Energies* [8], *Nutrients* [9], *Cells* [10], *Plants* [11], *Animals* [12], *Viruses* [13], *Forests* [14], *Foods* [15], *Catalysts* [16], *Genes* [17], *Metals* [18], *Processes* [19], and *Microorganisms* [20]. *Bloods* will take this form as the journal title.

Since 2018, MDPI has become the largest publisher of open access articles in DOAJ and, in 2019, the fifth largest publisher of scholarly journals [21]. We provide the best peer review editorial service according to the Publons database this year [22]. Of course, we would like to hear from our authors, reviewers, and academic medical scientists to maintain and improve this fast and rigorous peer review.

We hope you enjoy publishing with us!
