Equation Correction

The authors would like to make the following corrections to the original publication [1].

There was an error in the original publication. A mathematical sign of coefficient (0.25) in Equation (18) is a plus sign which is not correct. A correction has been made to Equation (18) and the coefficient has been updated as -0.25 .

The corrected version is:

$$V_s = 10^{2.075 - 0.213 \cdot I_c} \cdot \left(\frac{\sigma'_{v0}}{1 \text{ kPa}} \right)^{0.77 - 0.25 \cdot \log_{10}(\alpha)} \quad (18)$$

The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
