Following publication, the Editorial Office became aware that the original article [1] may lack an explanation in the text that it is an extension of the previously published Portuguese conference paper [2].

Adhering to our standard procedure, the Editorial Office conducted an investigation with the support of the Editorial Board and in full collaboration with the authors. The evaluation confirmed that the statement of the previously published Portuguese conference paper [2] in the text needs to be added and that the publication does not constitute redundancy. The authors agreed to correct the publication by adding the following information:

A phrase to the last paragraph of Section 1. Introduction: “This is an extended version of the conference paper [24].”.

The reference 24 [2] in the reference list.

With this correction, the order of some references has been adjusted accordingly. The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
