New generations are key players at present, but they are also our future, those who will lead any future changes and innovation.

Therefore, to contribute to a healthy future, it is necessary to maintain a lively focus on the growth and upbringing of new generations, including the education system and the social aspects related to their growth.

Future (ISSN 2813-2882) [1] is a multidisciplinary, peer-reviewed, open access journal that focuses on research studies related to child and adolescent health, development, and education. The journal aims to support research and health, schools, and education providers, as well as families and policy-makers, to better understand aspects of child and adolescent development.

Future is dedicated to publishing high-quality, original articles, critical reviews, research notes, protocols, case reports and short communications. We would like to extend a warm welcome to the EiC and founder of the journal, Prof. Dr. Jun Ma, and all members of the Editorial Board of this promising new journal.

As with all the other MDPI journals, we strive to provide excellent service as well as a fast and rigorous peer review process. We hope that you will enjoy publishing with us.

Conflicts of Interest: The author declares no conflict of interest.
