Supplementary Table 1. Microbiology of previously identified pathogens through surgically retrieved cultures

Microorganism	Percent of positive cultures among all (n=25)
Total cultures	100
Serratia marcescens	16
Klebsiella oxytoca	12
Escherichia coli	12
Pseudomonas aeruginosa	8
Candida parapsilosis	8
Haemophilus parainfluenzae	8
Streptococcus pseudoporcinus	8
Staphylococcus aureus	8
Achromobacter xylosoxidans	8
Streptococcus spp.	8
Klebsiella pneumoniae	8
Staphylococcus epidermidis	8
Staphylococcus hominis	8
Streptococcus mitis	4
Parvimonas micra	4
Enterococcus faecium	4
Staphylococcus haemolyticus	4
Stenotrophomonas maltophilia	4
Streptococcus parasanguinis	4
Streptococcus viridans	4
Streptococcus constellatus	4
Streptococcus gordonii	4
Streptococcus anginosus	4
Acinetobacter ursingii	4
Streptococcus salivarius	4
Enterobacter cloacae	4
Acinetobacter baumannii	4
Proteus mirabilis	4
Enterococcus faecalis	4
Acinetobacter pittii	4
