Figure S1. QGIS analyses of landscape elements within a 1 km radius of the experimental vineyards (A01-A09) as determined from ortho-images. Analyzed landscape elements: vineyards, annual crops, perennial crops, woody habitat, herbaceous habitat and water. Woody: wood area and tree alleys between vineyards or crop field; Herbaceous habitat: natural and semi-natural pastures and meadows; Annual crops: cereals, other annual crops; Perennial crops: orchards, asparagus; Vine: vineyards.
