Supplement Figure

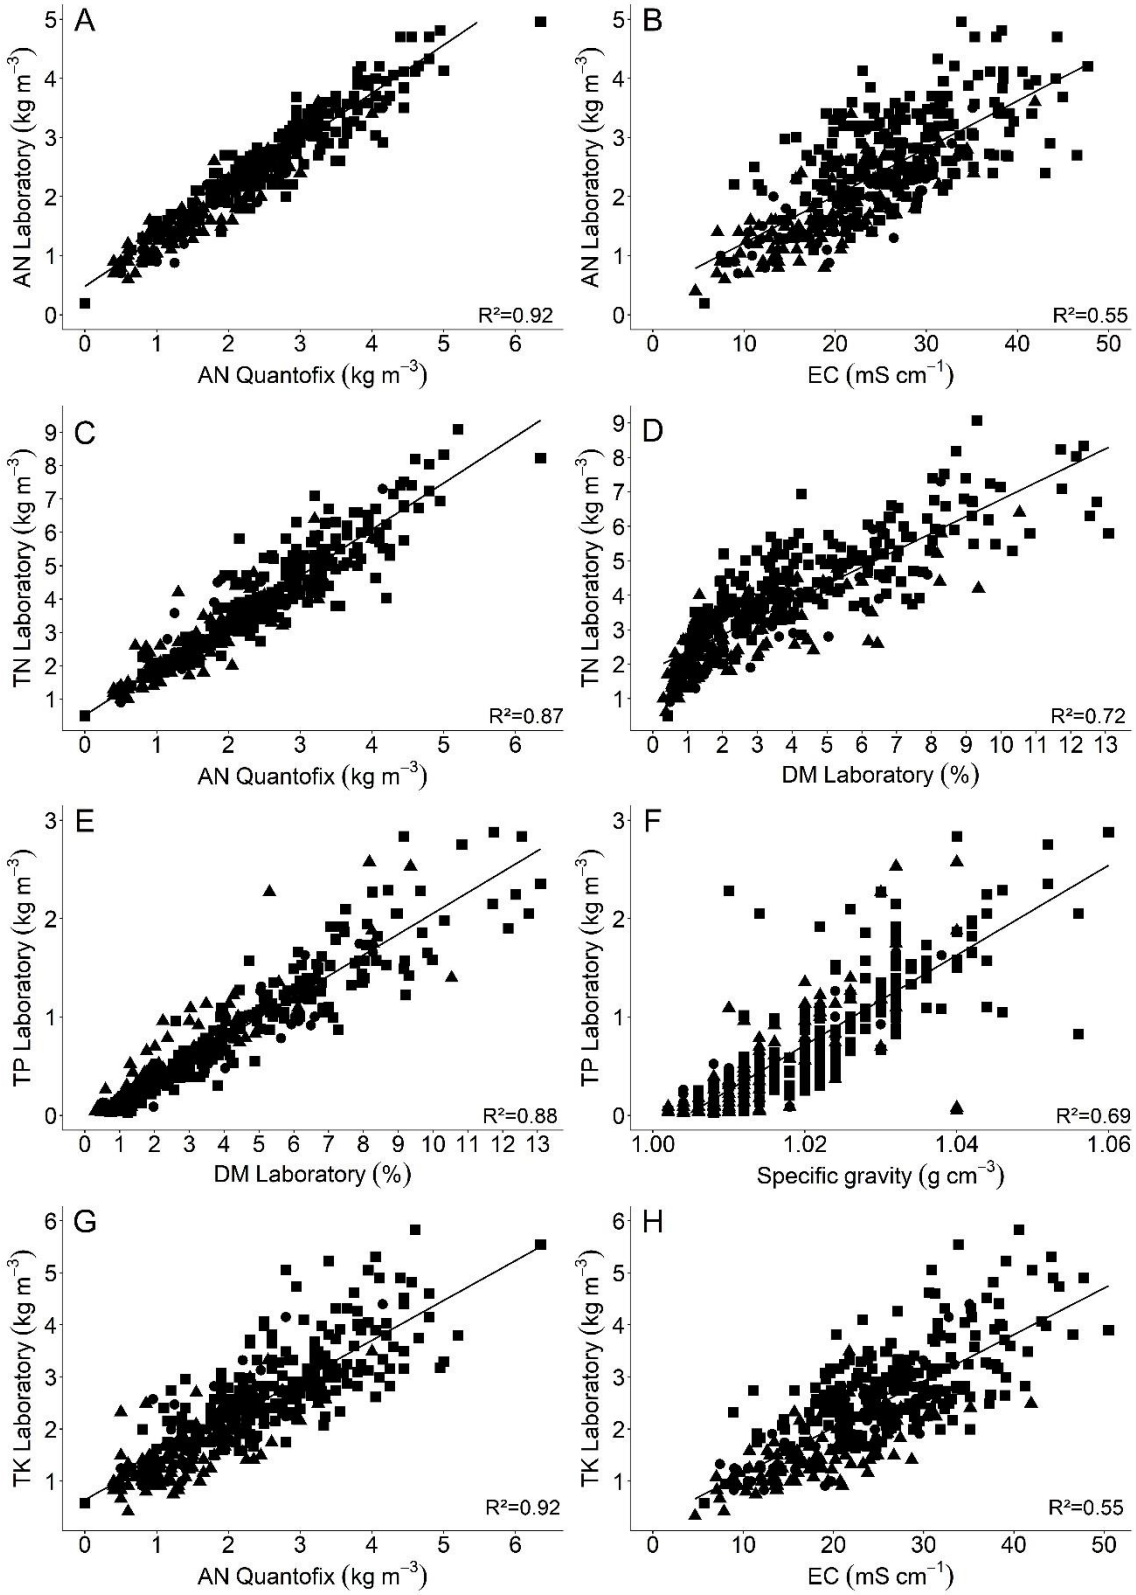

Figure S1: Relationships for the laboratory measurements versus the quick tests and easy determinable parameters of the total sample set (n = 391): (A) Q vs. AN, (B) EC vs. AN (C) Q vs. TN, (D) DM vs. TN, (E) DM vs. TP, (F) SG vs. TP, (G) AN vs. TK and (H) EC vs. TK; "fattening pigs" (■), "piglets" (●), "sows" (▲); Q = Quantofix, AN = Ammonium, EC = electrical conductivity, TN = Total Nitrogen, DM = Dry matter, TP = Total Phosphorus, SG = Specific gravity, TK = Total Potassium
