gs(1)	0.43	0.83	0.91	0.10	0.80	15.41	15.94	87.85

h<sup>2</sup>g: Heritability of individual plants in the broad sense; h<sup>2</sup>mg: Heritability of the genotype average; Accgen: Accuracy of genotype selection; Czint: Coefficient of determination of the effects of genotype x environment interaction; rgloc: genotype correlation between performance in the various environments; CVgi%: genotype coefficient of variation; CVe%: coefficient of residual variation; A: overall average of the experiment. PH – plant height, SD – stem diameter, ID – increment in stem diameter, concentrations of the nutrients potassium – K, magnesium – Mg, sulfur – S, copper – Cu, iron – Fe, zinc – Zn, boron – B, and physiological trait; stomatal conductivity at the 30<sup>th</sup> day of the experiment (first evaluation) – gs(1).

\*Initial analysis was performed for 19 commercial and further 3 eucalypt genotypes that were selected from other experiments and at initial testing phase.

**Supplementary Table S2.** Average, standard deviation (SD) and coefficient of variation (CV) from three replications of *Eucalyptus* clones submitted to treatments with water stress (100H<sub>2</sub>O and 300PEG) and control treatment in relation to the morphological, nutritional and physiological traits in an experiment in a completely randomized block design and split plot arrangement.

**Supplementary Table S3.** Average water potential (MPa) of leaves of 19 commercial clones submitted to control treatment and water deficit simulation based on water restriction (100 H<sub>2</sub>O) and application of polyethylene glycol solution (300 PEG). The water potential was accessed in two periods, from 3:00 am to 5:00 am (dawn) and from 1:00 pm to 3:00 pm (afternoon).

T = tolerant to water deficit; S = susceptible to water deficit. Control treatment – daily irrigation according to the nursery protocol; 300 PEG treatment – irrigation as in Control in addition to the application of 100 ml solution of 300 g L<sup>-1</sup> PEG 6000; and 100 H<sub>2</sub>O treatment – irrigation restricted to 100 ml H<sub>2</sub>O daily. Average ± standard deviation **Disclaimer/Publisher's Note:** The statements, opinions and data contained in all publications are solely those of the individual author(s) and contributor(s) and not of MDPI and/or the editor(s).
