

Supplementary

P014

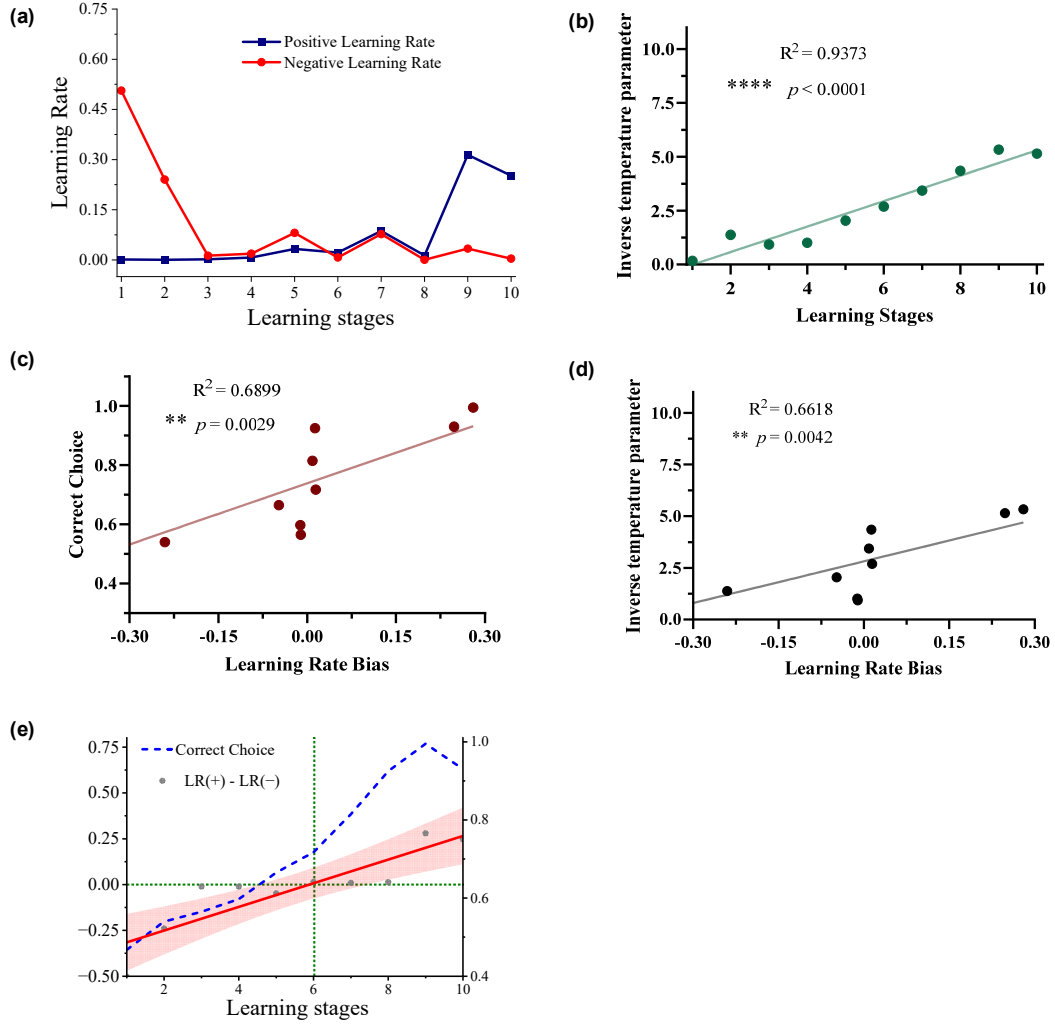

Figure S1. The model results of P014. (a) (a, b) Dynamic learning rate and inverse temperature parameter β of Model 2 (RLB) during the learning process. (c, d) Relationship between learning rate bias and choice performance, inverse temperature parameter β . (e) Dynamic learning rate (LR) bias and choice performance as a function of learning stages.

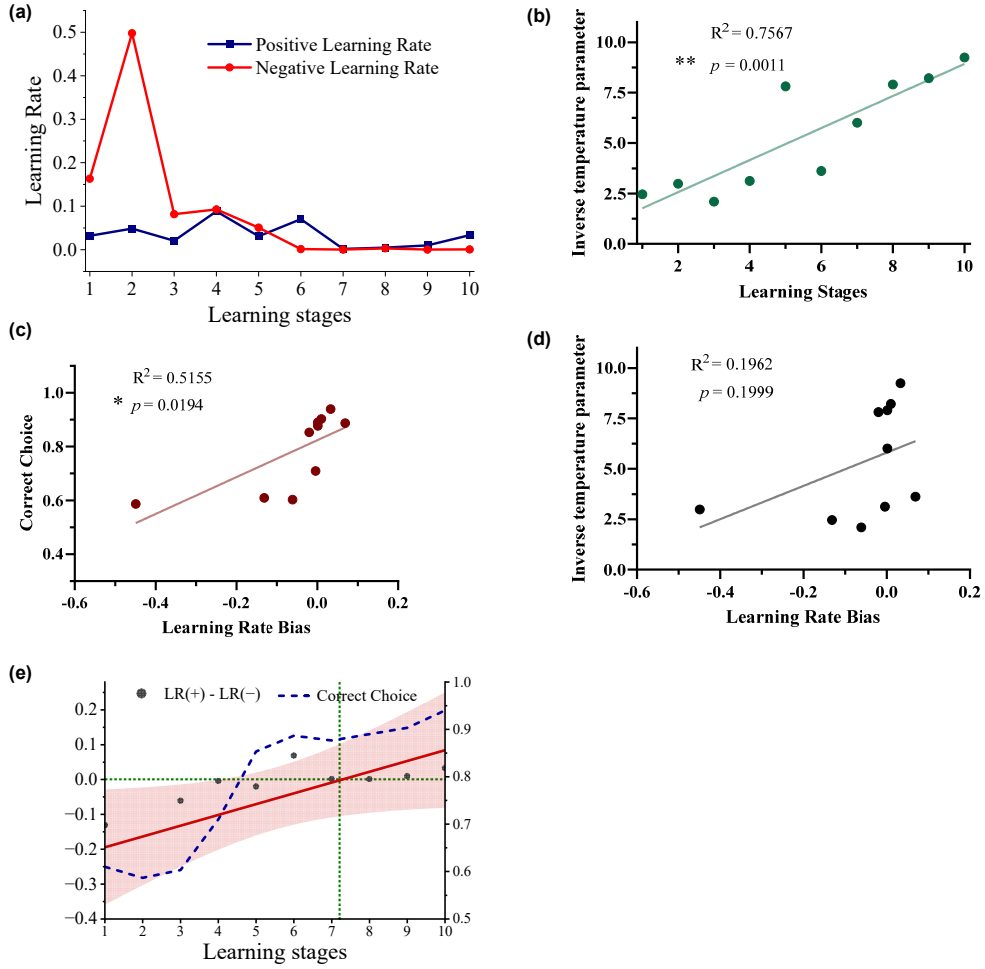

Figure S2. The model results of P093. (a) (a, b) Dynamic learning rate and inverse temperature parameter β of Model 2 (RLB) during the learning process. (c, d) Relationship between learning rate bias and choice performance, inverse temperature parameter β . (e) Dynamic learning rate (LR) bias and choice performance as a function of learning stages.

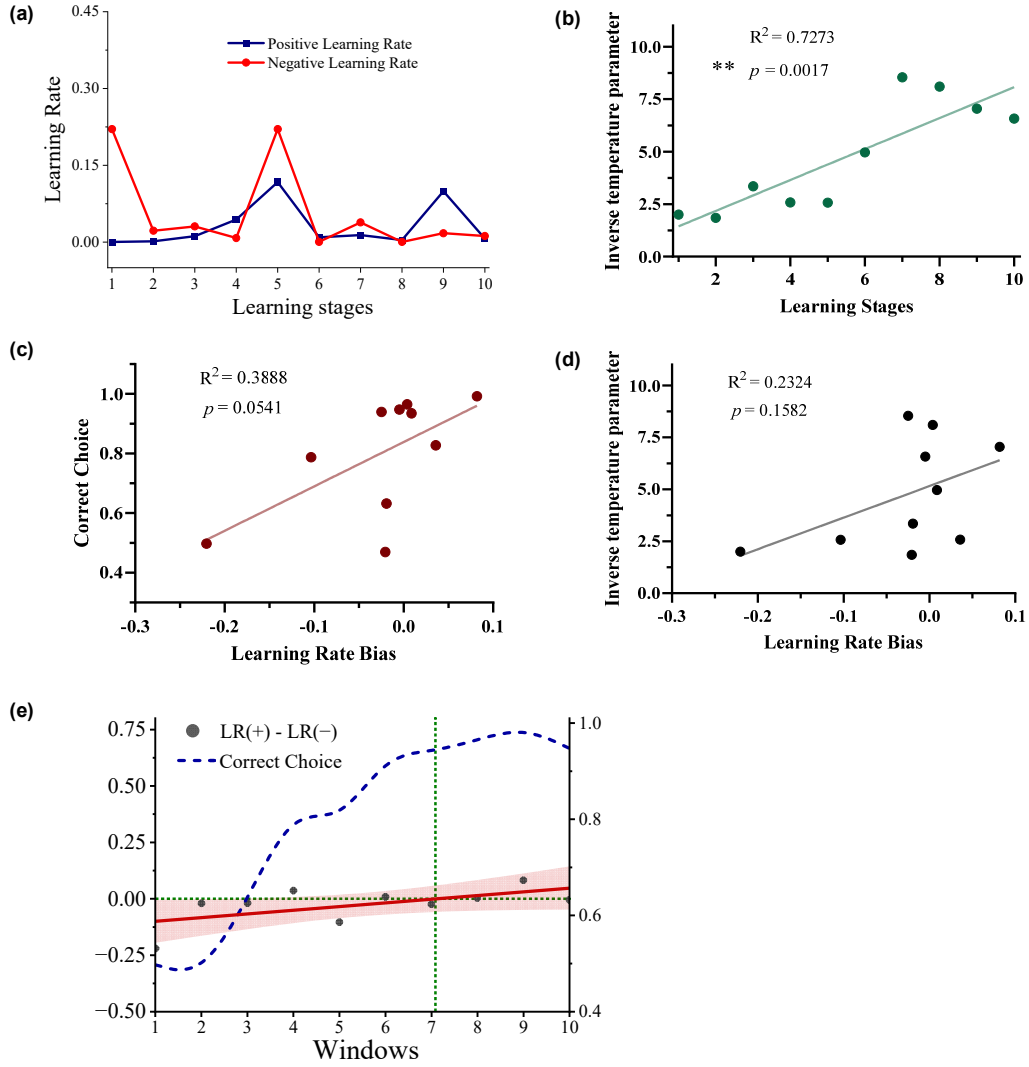

Figure S3. The model results of P021. (a) (a, b) Dynamic learning rate and inverse temperature parameter β of Model 2 (RLB) during the learning process. (c, d) Relationship between learning rate bias and choice performance, inverse temperature parameter β . (e) Dynamic learning rate (LR) bias and choice performance as a function of learning stages.

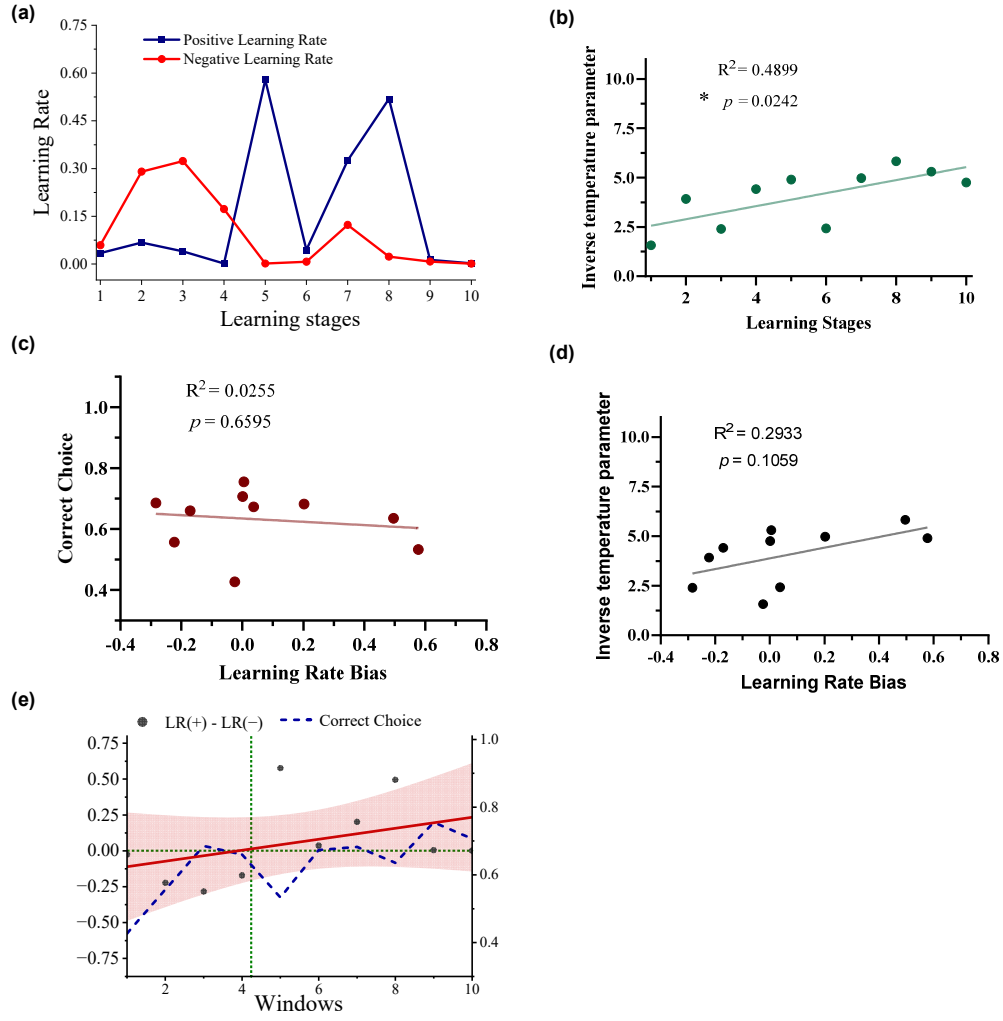

Figure S4. The model results of P029. (a) (a, b) Dynamic learning rate and inverse temperature parameter β of Model 2 (RLB) during the learning process. (c, d) Relationship between learning rate bias and choice performance, inverse temperature parameter β . (e) Dynamic learning rate (LR) bias and choice performance as a function of learning stages.
