Supplementary Materials

Table S1. Body weight of fish used in hepatic gene expression analysis expressed as mean ± SD (n = 9 per experimental group). STD, standard diet; HFM, modified diet; 2N, diploid; and 3N, triploid.

Month	Diet	Ploidy	Weight (g)
October	STD	2N	35.3 ± 13.2
October	HFM	2N	27.5 ± 9.1
October	STD	3N	35.9 ± 13.8
October	HFM	3N	38.2 ± 8.9
November	STD	2N	56.6 ± 8.0
November	HFM	2N	50.6 ± 7.1
November	STD	3N	65.6 ± 11.9
November	HFM	3N	56.1 ± 9.3
December	STD	2N	76.8 ± 10.2
December	HFM	2N	69.2 ± 10.9
December	STD	3N	77.6 ± 11.7
December	HFM	3N	78.3 ± 19.9
