Table S1. Timetable for preparing the extracts and conducting the experiments.

Activity.	Start Date	End Date
UHPLC-DAD-MS ⁿ Analysis	08-23-2017	09-12-2017
Preparation of extracts	10-14-2016	12-14-2016
Determination of extracts ability for the scavenging of DPPH	12-20-2016	01-26-2017
Determination of extracts ability for the scavenging of superoxide anion	01-31-2017	03-09-2017
Determination of extracts ability for the scavenging of hydrogen peroxide	09-14-2017	10-03-2017
Determination of extracts effect on the Lipoxygenase activity	04-27-2017	08-24-2017
Determination of extracts effect on the Hyaluronidase activity	10-26-2017	12-21-2017
Determination of total polyphenol content by colorimetric method with Folin'a Ciocalteu reagent	09-05-2017	09-05-2017

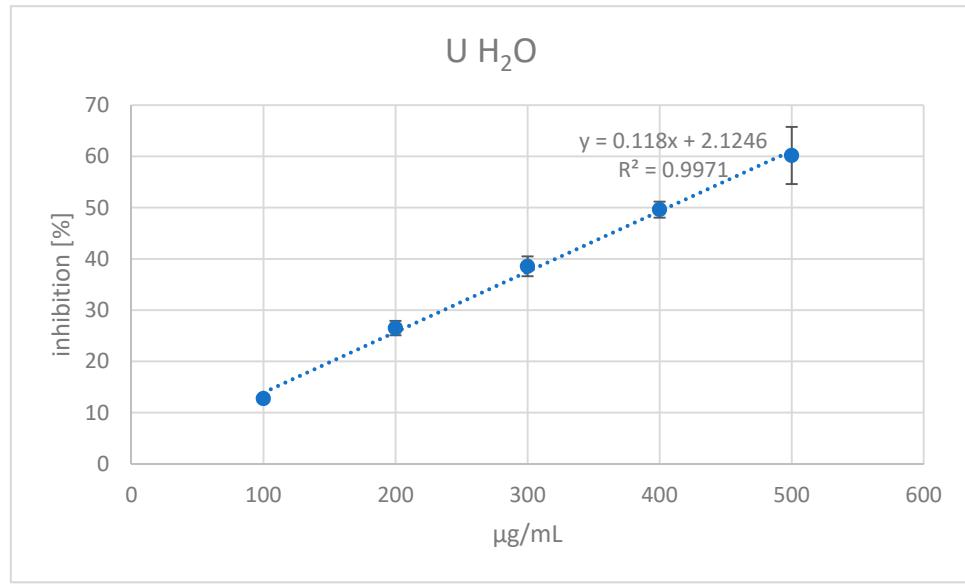

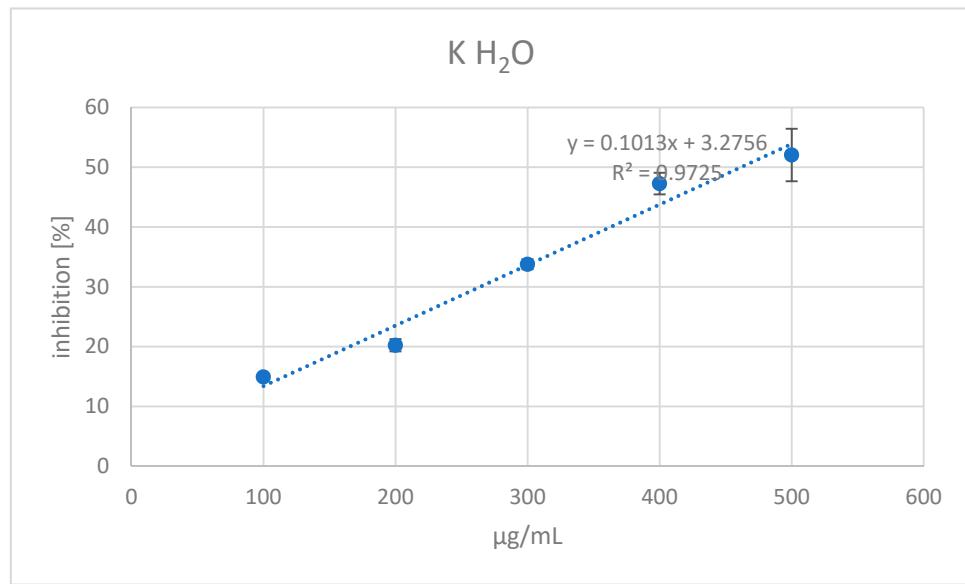

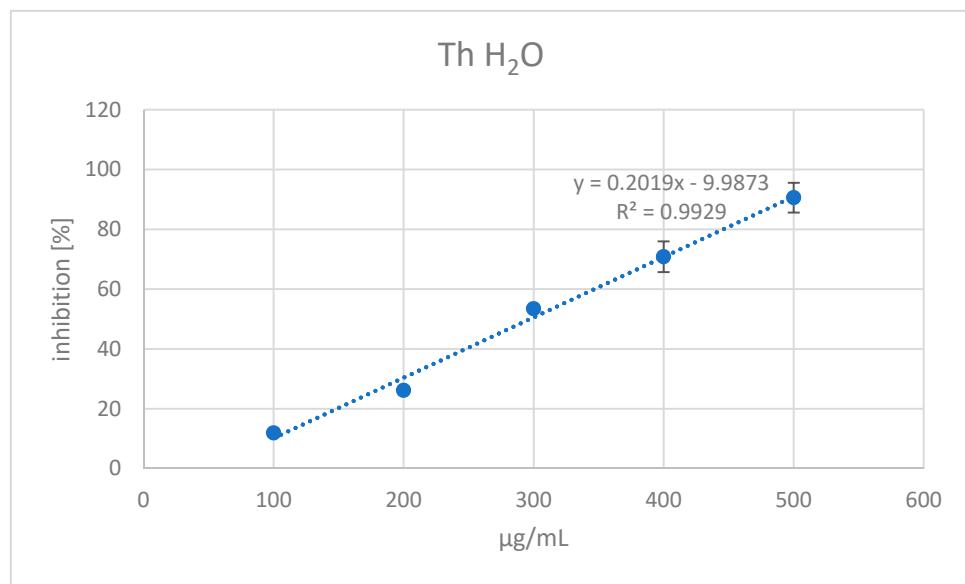

Figure S1. Concentration-activity curves of the most active extracts in the test of LOX inhibitory activity. Th EtOH – *Serpulli herba* ethanolic extract, Th H₂O – *Serpulli herba* aqueous extract, K H₂O – *Milefolli herba* aqueous extract, U H₂O – *Urticae herba* aqueous extract.
