

Supplementary tables

Table S1

A three-way ANOVA for the effect of treatment (Trt.) with eCO₂, the plant species (Sp.) and the stage of plant leaf (St.) as well as their interaction on the biomass and photosynthesis as well as the molecular antioxidants and the oxidative markers (numbers represent F values; ns= non-significant; *= P < 0.05; ** = P < 0.01; *** = P < 0.001, **** = P < 0.0001)

| Dependent variables | Independent variables | | | | | | |

Supplementary Figure

Figure S1

A photograph that illustrates the differential effects of eC2 either lonely or in combination with In2O3-NPs upon the biomass of C3 and C4 plants.
