Statistically significant correlations: * $p < 0.05$ ** $p < 0.01$ *** $p < 0.001$

Abbreviations: Numbers 1–28 are phenolic compounds presented in Tables 1 and 2;

ABTS, scavenging capacity of ABTS radical; FRAP, ferric reducing antioxidant power; DPPH, scavenging capacity of DPPH radical

Table S3. Contribution of the different phenolic compounds and antioxidant methods to the PCA factors (PC1 and PC2).
