Legend to Table S2: Each day the growth and sporulation of each mould was visually inspected, ranked, and scored. A score of 0 indicates no growth (white boxes), a score ≤ 0.5 indicates growth without sporulation (light green boxes), and ≤ 1.5 growth with sporulation (green boxes). A score of 1.5 (complete sporulation of the colony) is indicated in dark green. In the boxes average score values are provided. The experiment was independently repeated three times using three fruits each.
