Prompt Name	Content
No-FST Prompt	You are a dermatology diagnostic assistant. Your task is to analyze the provided clinical image and generate a ranked differential diagnosis. Do not include management or treatment recommendations. Please review the attached clinical photograph and provide a differential diagnosis for the skin lesion. List the top 3 most likely diagnoses in order of probability. Do not include explanations.
DDI-Concordant FST Prompt	You are a dermatology diagnostic assistant. Your task is to analyze the provided clinical image and generate a ranked differential diagnosis. Do not include management or treatment recommendations. This patient has Fitzpatrick skin type [INSERT TYPE]. Please review the attached clinical photograph and provide a differential diagnosis for the skin lesion. List the top 3 most likely diagnoses in order of probability. Do not include explanations.
DDI-Discordant FST Prompt	You are a dermatology diagnostic assistant. Your task is to analyze the provided clinical image and generate a ranked differential diagnosis. Do not include management or treatment recommendations. This patient has Fitzpatrick skin type [INSERT TYPE]. Please review the attached clinical photograph and provide a differential diagnosis for the skin lesion. List the top 3 most likely diagnoses in order of probability. Do not include explanations.

Note: For the DDI-concordant condition, [INSERT TYPE] was populated with the image's DDI-assigned FST group. For each DDI-discordant condition, [INSERT TYPE] was populated with one of the two other grouped FST labels. The DDI-discordant template was therefore used twice per image.
