		Mean	s.e.m					
	Control	1.025	0.097					
	shOrai1	0.279	0.039					

Four samples, corresponding to 4 independent cultures non treated (Control) or transfected (shOrai1) with silencing plasmid shOrai1 were used to perform WB. The Table shows individual readings (OD) for each band and the normalized signal, as well as the average (and s.e.m) value for Control and transfected samples.
