Supplementary Document S3.Individual graphs for each dataset in Figure 3.

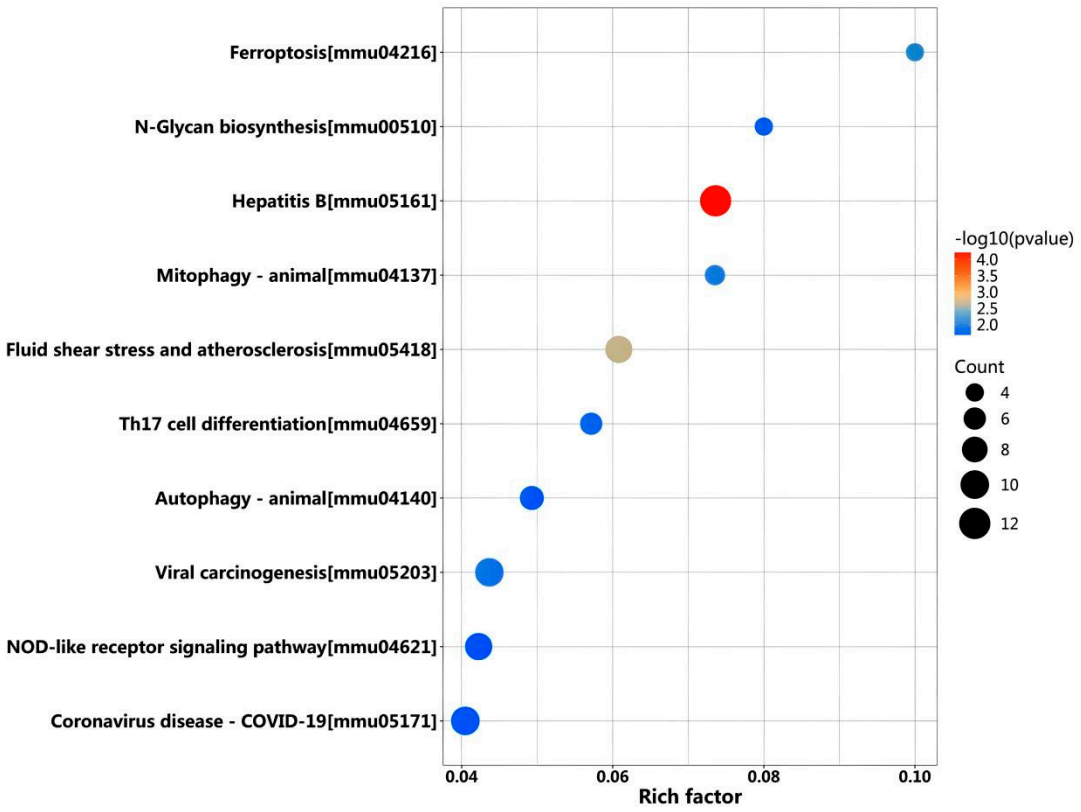

(A) Histogram of COG analysis for differentially expressed proteins: The horizontal axis represents the functional categories of COG classification, and the vertical axis indicates the frequency of COG assignments.

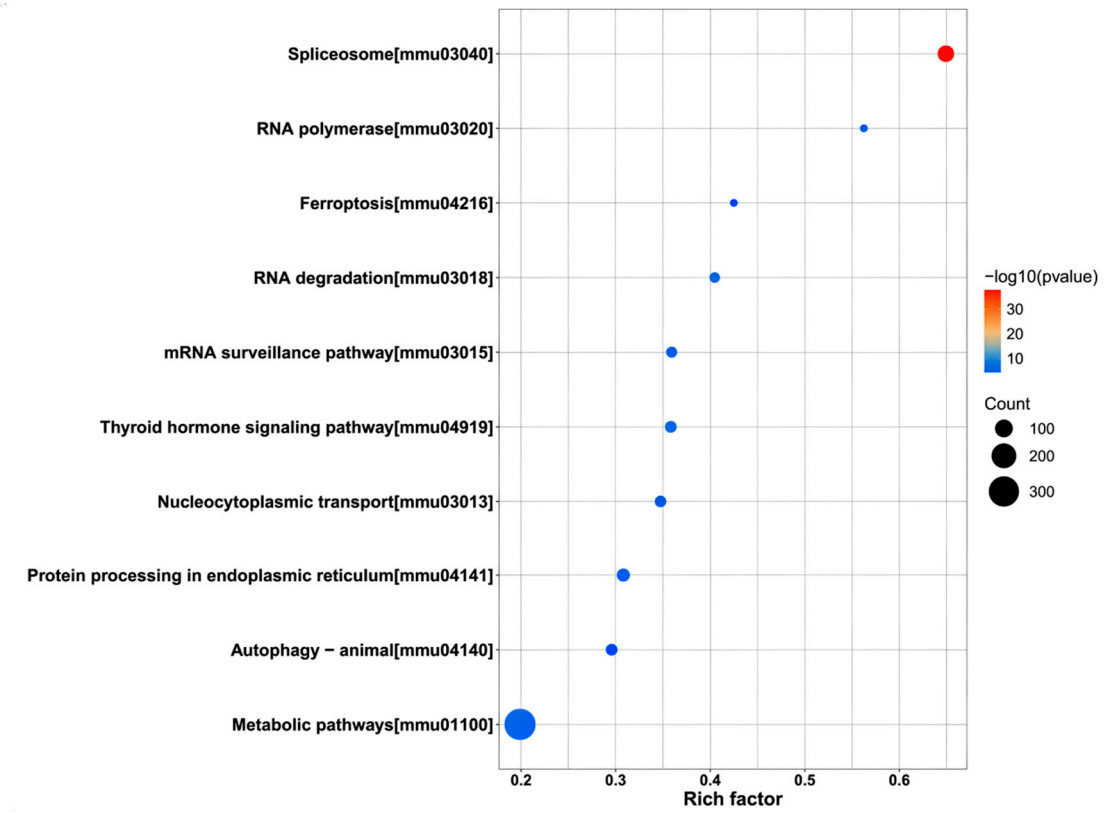

(B) Pie chart illustrating the subcellular localization analysis of differentially expressed proteins.

(C) Bar chart of GO enrichment analysis for the comparison Con vs Tp vs Cur-M.

(D) Bubble plot of KEGG pathway enrichment analysis for the comparison Con vs Tp.

(E) Bubble plot of KEGG pathway enrichment analysis for the comparison Tp vs Cur-M.
