

Figure S2. Statistics of CG, CHG and CHH methylated levels of *GmSUVR5*, *GmSUVH12* and *GmSUVH13* in Jack (J) and Williams82 (W). The ANOVA analysis revealed that the differences in the levels of CG, CHG, and CHH methylation among the various tissues and varieties for *GmSUVR5*, *GmSUVH12*, and *GmSUVH13* were not significant.
