

## Supplemental figure 2

**Supplemental Figure S2. Polarization of MDM.** Monocyte derived macrophages (M0) were polarized into M1(LPS, IFN- $\gamma$ ), M2a (IL-4, IL-13) and M2c (IL-10) macrophage subtypes. To validate the MDM polarization, the expression of cell surface markers CD163, TLR-2, CD206 and CD80 were investigated for each subtype using flowcytometry. Repeated measures one way ANOVA with Dunnet's multiple comparisons test.
