

Supplementary Figure S1

QD

BT-474

BT-474-C5

Supplementary Figure S1. HER-2 expression of human HER-2 transgenic mammary carcinoma cell line QD, of human breast cancer cell line BT-474 and of its trastuzumab-resistant clone C5, as determined by indirect immunofluorescence and flow cytometry. Red profile: anti-HER-2 monoclonal antibody MGR-2 + anti-mouse Ig AF488; black profile: anti-mouse Ig only.

Supplementary Figure S2

Supplementary Figure S2. Weight curves of FVB mice challenged i.m.f.p. with QD cells and vaccinated with ES2B-C001. See Figure 1 for tumor growth in these mice and Figures 3 and 4 for antibody kinetics.
