

Figure S3: Formation of uroplakin plaques in BCa organoids. Analysis of uroplakin-II (UPL-II) and uroplakin-III (UPL-III) immunoreactivity in BCa cells. (a) Representative images of BCa Orgs immunostained for UPL-II (a, brown) and UPL-III (b, brown); cell nuclei (blue). Uroplakins were almost not existent. Scale bar: 100 μ m.
