

Figure S2

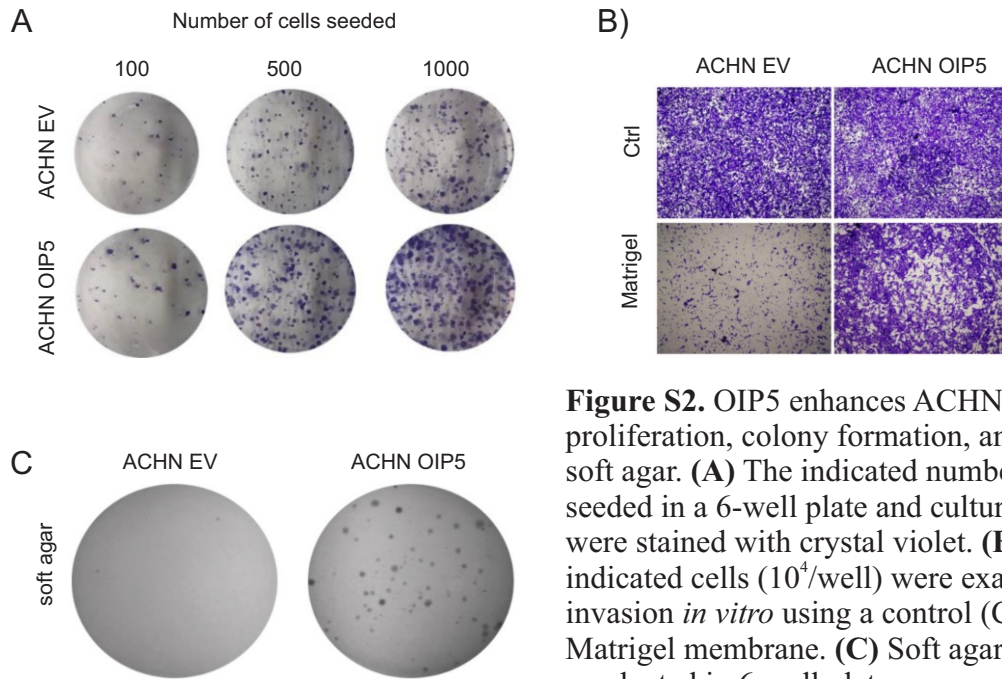

Figure S2. OIP5 enhances ACHN cell proliferation, colony formation, and growth in soft agar. **(A)** The indicated number of cells were seeded in a 6-well plate and cultured. Colonies were stained with crystal violet. **(B)** The indicated cells (10^4 /well) were examined for invasion *in vitro* using a control (Ctrl) and Matrigel membrane. **(C)** Soft agar assay was conducted in 6-well plate.
