OARs, organs at risk; PBT, proton beam therapy; 3D-CRT, three-dimensional conformal radiotherapy; IMRT, intensity-modulated

radiotherapy; VMAT, volumetric modulated arc therapy, CGE, Cobalt Gray Equivalent; fx, fractions; PTV, planning target volume;

SABR, stereotactic ablative radiotherapy; CI, conformity index; GI, gradient index; Dmax, maximum dose; Dmin, minimum dose; V5-40; percentage volume of tissue receiving 5-40 Gy; D1cc, the dose delivered to 1 cubic centimeter volume; D30cc, the dose delivered to 30 cubic centimeter volu

Supplementary Figure S1. The volume-dose metrics comparisons for the lung and heart according to different modalities in all cases ($n = 42$). The points are representing the median values of respective parameters. The Kruskal-Wallis test was used to determine the significant difference among the groups.

Not significant are not shown. * ≤ 0.05 ; ** ≤ 0.01 ; *** ≤ 0.001 ; **** ≤ 0.0001 .

PBT, proton beam therapy; 3D-CRT, three-dimensional conformal radiotherapy; IMRT, intensity-modulated radiotherapy; VMRT, volumetric-modulated arc therapy; Vdose, volume dose; V5-40, percentage volume of tissue receiving 5-40 Gy.
