

Supplementary Materials

HSC-3	Oral squamous carcinoma
U251MG	Glioma
MCF-7	Breast cancer cells
HT29	Colon adenocarcinoma
SH-SY5Y	Neuroblastoma
MeWo	Melanoma
HepG2	Hepatocellular carcinoma
HeLa	Cervix adenocarcinoma
JEG-3	Choriocarcinoma
PANC-1	Pancreatic carcinoma cells

Figure S1: Effect of Amb544925 on cell viability in various cancer cell lines. Cells were pre-incubated with various concentrations of Amb544925 for 24h, and then the cells were counted. The results are given as a percentage of the findings in the vehicle control. Each point represents the mean \pm S.D.(n=4).
